

MONITOR HILLS Geology and Sampling

- Qwbs Wind-blown sand
- Tbt Biotite tuff
- Os "Siltite"; light and dark with silty limestone interbeds
- Old Laminated dolomite
- Oals Argilaceous limestone
- Ebcls Banded limestone
- Ells Lower limestone
- mrb Bleached, recrystallized in proximity to bed

- Tmd Mafic dike
- Tpeg Pegmatite
- Tgr Granite
- Tbd Diorite

- J Jasperoid

- Contact
- Fault
- Shear zone
- Breccia
- Quartz veins
- Calcite
- FeOx staining
- Existing trench

- Sample location: rock chip and float
- ≥300 - <1000 Au ppb
- ≥1000 Au ppb
