Management's Discussion and Analysis For the Years Ended September 30, 2019 and 2018 (Expressed Canadian Dollars)

This Management's Discussion and Analysis ("MD&A") focuses on significant factors that have affected Allegiant Gold Ltd. (the "Company" or "Allegiant") and its subsidiaries' performance and such factors that may affect its future performance. This MD&A should be read in conjunction with the Company's audited consolidated financial statements and related notes for the year ended September 30, 2019 which was prepared in accordance with International Financial Reporting Standards ("IFRS"), as issued by the International Accounting Standards Board ("IASB"). All figures in this MD&A are expressed in thousands of Canadian Dollars except for share and per share amounts, or unless otherwise noted. References to "US\$" are to thousands of US Dollars. "This quarter" or "current quarter" means the three-month period ended September 30, 2019 and "this year" or "current year" means the year ended September 30, 2019. The information contained in this MD&A is current to the Report Date as defined on the cover page.

Forward looking information

This MD&A contains "forward-looking information and statements" that are subject to risk factors set out under the caption *Caution regarding forward looking statements* later in this document. The reader is cautioned not to place undue reliance on forward-looking statements.

Profile and Strategy

Allegiant was incorporated on September 26, 2017 under the laws of the Province of British Columbia, Canada. The Company was a wholly-owned subsidiary of Columbus Gold Corp. ("Columbus Gold"), a Toronto Stock Exchange listed company, until January 25, 2018, when it was spun-out of Columbus Gold by way of a plan of arrangement (the "Arrangement") as a separate entity. The Company obtained its initial listing on the TSX Venture Exchange ("TSXV") on January 30, 2018. The common shares of the Company are also listed on the OTCQX effective February 26, 2018.

On October 1, 2017, the Company acquired Allegiant Gold Holding Ltd. ("AGHL") from Columbus Gold, which indirectly held all of Columbus Gold's exploration and evaluation assets located in the USA.

The Company's head office and principal address is located at 1090 Hamilton Street, Vancouver, British Columbia, V6B 2R9, Canada.

The Company's principal business activities are the acquisition, exploration and development of resource properties, with gold as a principal focus. The Company is in the process of exploring and developing its resource properties but has not yet determined whether the properties contain ore reserves that are economically recoverable. The Company maintains active generative (prospecting) and evaluation programs and, as a key element of its strategy, broadens exposure, diversifies funding sources and minimizes risk through joint ventures on selected projects.

The Company's financial condition is affected by general market conditions and conditions specific to the mining industry. These conditions include, but are not limited to, the price of gold and accessibility of debt or equity financing.

Overall Performance and Updates

The following highlights the Company's overall performance for the three months and year ended September 30, 2019 and 2018:

	Three Months Ended			Y	ear Ended		
	September 30, Se	September 30, September 30,			September 30, September 30,

Balance at September 30, 2019	24,001,252

Bolo

The Bolo project is located approximately 60 km northeast of Tonopah, Nevada. The Company holds a 100% interest in Bolo, subject to underlying royalties.

On June 27, 2018, the Company entered into an agreement with a Barrian Mining Corp. ("Barrian"), under which Barrian may acquire up to a 50.01% undivided interest in Bolo by issuing common shares of Barrian to the Company, with an aggregate value of \$1,310,000 (US\$1,000,000) over a three year period, and also incurring certain exploration and evaluation expenditures on Bolo with a minimum aggregate value of \$5,240,000 (US\$4,000,000) by December 31, 2022. On April 24, 2019, the Company received 1,672,750 shares of Barrian, representing an initial \$334,550 (US\$250,000) option payment.

Barrian may acquire an additional 24.99% interest in Bolo by incurring an additional \$5,240 (US\$4,000,000) in certain exploration and evaluation expenditures on Bolo within two years of acquiring the initial 50.01% interest in Bolo. If Barrian does not acquire the additional 24.99% interest, then Barrian will transfer a 0.02% interest in Bolo back to the Company.

During September 2019, Barrian completed a 10 hole reverse circulation drill program for a total of 1,838 metres. Seven of the drill holes, totalling 1,338 metres, were completed at the South mine fault zone, testing the extent of mineralization down dip and along strike. Previous RC drill intercepts at the South mine fault area include drill hole BL-38 that graded 3.24 grams per tonne (g/t) gold over 30.5 metres within a broader zone of mineralization averaging 1.28 g/t gold over 133 metres.* One drill hole, totalling 177 metres, was completed between the South mine fault zone and Northern extension zone, testing both the continuity of mineralization along strike between the known zones, and a linear conductive anomaly identified by the 2019 induced polarization and resistivity geophysical survey. Two drill holes, totalling 323 metres, were completed at the historical Uncle Sam patented claim which has yielded high-grade silver plus gold channel rock chip samples including 3,146 g/t silver and 1.0 g/t gold over 2.6 metres, and 365 g/t silver and 1.9 g/t gold over 3.6 metres.** Uncle Sam hosts high-grade silver plus gold mineralization at surface and in drill samples, and is the site of historical (circa 1880s) mine workings.

Management's Discussion and Analysis For the Years Ended September 30, 2019 and 2018 (Expressed Canadian Dollars)

^{**} The true width of mineralization at Uncle Sam is unknown. For full descriptions of the Bolo property mineralized intercepts see: "Technical Report on the Bolo Property, Nye County, Nevada, USA" effective date Oct. 5, 2018, available at SEDAR 2019 Bolo Gold-Silver Project RC Drilling -- Significant Results

⁽¹⁾ The true width of mineralization in most drill holes is estimated to be approximately 60 to 70 per cent of drilled width.

Browns Canyon

The Browns Canyon project is 100% owned by Allegiant and is located approximately 19 km southwest of Eureka, Nevada.

On December 13, 2018, the Company announced the completion of drilling at Browns Canyon (North Brown) and corresponding results announced on January 28, 2019. A total of 2,036 metres of rotary drilling in 11 holes were completed, and results were announced on January 28, 2019. There were no reportable gold intercepts from any of the holes, however, there are excellent grade gold samples (from nil up to 9 g/t gold) at the North Brown gold anomaly which are in angular, altered fragments, up to 0.3 meters in diameter, in a carbonate breccia horizon in the Devonian sequence. The Company believes the mineralized fragments in the breccia are transported along a flat fault from a local source near the North Brown anomaly. Field work and additional geophysical work will continue to discover the source of the mineralized breccia fragments.

^{*} The true width of mineralization is estimated to be approximately 50 per cent of drilled width.

Management's Discussion and Analysis For the Years Ended September 30, 2019 and 2018 (Expressed Canadian Dollars)

<u>Eastside</u>

The Eastside project is located approximately 32 km west of Tonopah, Nevada. Subject to underlying royalties, Allegiant controls a 100% interest in Eastside.

On June 11, 2019, the Company announced results from drilling at Adularia Hill, which is located within the Eastside claim block, about 12 km south of the Original Zone gold deposit, approximately 2 km north of the past producing open-pit-heap-leach Boss Mine, and some 2 km north of Castle, which hosts an historical gold resource. Drilling consisted of 21 reverse-circulation holes totalling 3,170 metres. Eight of the 21 holes contained at least 1.5 metres of gold exceed 0.10 g/t Au.

Furthermore, the Company, as part of its 2020 exploration budget, has announced its intention to expand the permitted operating area at Eastside from 601 acres to approximately 3,200 acres. The proposed exploration program will evaluate numerous targets with the end goal of drilling the high-priority targets when the Company's permits are received. The Company has also identified up to five additional areas from alteration mapping and geochemical sampling that warrant further exploration.

Four Metals

On April 19, 2018 the Company and MinQuest Ltd. entered into an option agreement with Arizona Standard (US) Corp. (the "Four Metals Optionee") and Barksdale Capital Corp. ("Barksdale") granting the Four Metals Optionee an option to acquire a 100% interest in the Four Metals project located in Santa Cruz County, Arizona. The Four Metals Optionee is a wholly-owned subsidiary of Barksdale. The common shares of Barksdale are listed for trading on the TSXV. The Company and MinQuest Ltd. each own a 50% interest in 16 unpatented lode mining claims that, in addition to 24 unpatented lode mining claims that are 100% owned by the Company, comprise the Four Metals project. The option agreement requires the Four Metals Optionee to pay \$294,750 (US\$225,000) in staged payments over a five-year period. In addition, Barksdale will issue common shares with a total value of \$294,750 (US\$225,000) in staged issuances over the same five-year period. The cash payments and share issuances are shared equally with MinQuest Ltd. so that the Company will receive 50% of the cash and share payments.

On April 18, 2019, the Company received cash of \$16,670 (US\$12,500) and 33,016 common shares of Barksdale, with a fair value of \$16,838 (US\$12,500).

Hughes Canyon

The Hughes Canyon project is located approximately 48 km east-southeast of Lovelock, Nevada.

On January 17, 2019, the Company announced the completion of drilling at Hughes Canyon, with 12 rotary drill holes totalling 2,139 metres. Hydrothermal alteration was encountered in 10 of the 12 holes in several different stratigraphic units in a faulted and folded Mesozoic sedimentary package. Gold and silver values above 0.10 g/t gold encountered in the drilling are available in the Company's news release dated January 17, 2019, available on the Company's website at www.allegiantgold.com.

Effective January 18, 2019, the Company dropped and returned Hughes Canyon to the lessor.

Mogollon

On June 19, 2018, the Company entered into an agreement with Barrian, granting Barrian an option to acquire a 100% interest in Mogollon by issuing common shares of Barrian with an aggregate value of \$1,310,000 (US\$1,000,000) over an approximate three-year period. On April 24, 2019, the Company received 1,672,750 shares of Barrian, representing an initial \$334,550 (US\$250,000) option payment.

Management's Discussion and Analysis For the Years Ended September 30, 2019 and 2018 (Expressed Canadian Dollars)

Monitor Hills

The Monitor Hills project was owned 100% by Allegiant and is located approximately 35 km east-southeast of Tonopah, Nevada.

On April 17, 2019 the Company announced the receipt of assays from recent drilling carried-out at Monitor Hills which encountered broad zones of anomalous gold but better grade gold was only present in narrow 1.5 to 3 meter intervals. Overall the drilling results are considered too low-grade, and in the context of prioritizing expenditures on the Company's large portfolio of prospective exploration properties, the Company abandoned the Monitor Hills project.

Other Projects

The Big Lime project was determined to be a low priority project in the Company's portfolio and accordingly it was abandoned during the current year.

The Silver Dome project was determined to be a low priority project in the Company's portfolio and accordingly it was abandoned during the current year.

The Company's remaining projects, which are inclusive of Clanton Hills, Goldfield West, Overland Pass, White Horse Flats and White Horse North, are all considered to be highly prospective and the Company is focused on optioning them to quality partners for future development.

Allegiant Qualified Person – U.S. properties disclosure only

Andy B. Wallace is a Certified Professional Geologist (CPG) with the American Institute of Professional Geologists and is the Qualified Person under National Instrument 43-101 and has reviewed and approved the technical content relating to the properties located in the USA discussed herein. Mr. Wallace was VP and director of a subsidiary of the Company until July 3, 2019, and a principal of Cordilleran Exploration Company, LLC ("Cordex"), which conducted exploration and project generation activities for Allegiant on an exclusive basis until June 30, 2019. Mr. Wallace is presently an independent consultant to the Company.

Management's Discussion and Analysis For the Years Ended September 30, 2019 and 2018 (Expressed Canadian Dollars)

Review of Financial Results - Quarter to Quarter

The Company didn't generate any revenue during the current quarter or the prior year quarter ended September 30, 2018.

During the three months ended September 30, 2019, the Company incurred a net loss of \$322,906, which was a significant decrease from Q4 2018 of \$914,334. The main driver of the decrease in net loss was from the exploration property impairment recorded for Red Hills totaling \$314. The Company didn't record any property impairments during the current quarter.

Review of Financial Results – Year-to-Date

The Company didn't generate any revenue during the current year or the prior year.

During the year ended September 30, 2019, the Company incurred a net loss of \$2,384,503 compared \$3,865,015 in the prior year.

Investor relations decreased to \$61,739 this year compared to \$406,919 during the prior year. The decrease is primarily attributable to a reduction in marketing activities, including travel, attendance at conferences and advertising in publications.

Professional fees totaled \$100,714 this year compared to \$312,465 during the prior year. The higher costs during the prior year were in connection with the Arrangement, which was completed in January 2018.

During the prior year the Company granted 4,665,000 share options to certain directors, officers, employees and consultants of the Company, compared to 1,000,000 during the current year. The vesting of share options resulted in a non-cash share-based payment charge of \$1,647,277 in the prior year versus \$53,700 in the current year.

The Company recorded a change in fair value of short-term investments of \$33,785 this period in connection with its investments in common shares of Barrian and Barksdale. The Company had no short-term investments in the prior year.

The Company impaired and wrote-off the Hughes Canyon, Monitor Hills and Silver Dome projects in the current year resulting in an aggregate impairment charge of \$993,149. The Company only recorded \$396,872 in connection with property impairments in the prior year.

Liquidity and Capital Resources

The Company does not currently own or have an interest in any producing resource properties and does not derive any revenues from operations. The Company's activities have been funded primarily through private placements of the Company's common shares, and debt from Columbus Gold. The Company has been successful in its fundraising efforts in the past, but there can be no assurance that the Company will continue to be successful in the future. If such funds are not available or other sources of finance cannot be obtained, then the Company will be required to curtail its activities to a level for which funding is available and can be obtained. The Company's ability to access funding is also contingent on the ongoing demand for commodities and also a function of the demand for gold, both of which are subject to macroeconomic conditions and market fluctuations.

	Year End	Year Ended

Cash from financing activities	-	8,874,604		
Cash, end of the period	401,455	3,813,894		

Management's Discussion and Analysis For the Years Ended September 30, 2019 and 2018 (Expressed Canadian Dollars)

As at September 30, 2019, the Company had working capital of \$1,048,165, compared to \$2,082,863 at September 30, 2018. Working capital decreased primarily as a result of cash used for exploration activity during the year, partially offset with the reclassification of a promissory note payable to Columbus Gold of \$1,331,645 (principal balance of \$1,604,405) to non-current liabilities and the increase in available-for-sale investments.

During the year ended September 30, 2019, the Company used cash of \$1,186,031 in operating activities, a decrease of \$485,196 compared to the prior year. The decrease is attributable to a general decrease in operating expenses, mainly in investor relations and professional fees.

The Company used cash of \$2,230,407 in investing activities during the current year which was a decrease of \$1,159,076 compared to the prior year. The decrease is mainly attributable reduction in exploration and evaluation assets and the reimbursement of certain reclamation bonds.

The Company received \$nil from financing activities during the current year. During the prior year the Company received \$8,874,604 from financing activities mainly in connection with the Arrangement.

As at September 30, 2019, the Company had current liabilities of \$40,798 and non-current liabilities of \$1,331,645. The Company is evaluating options available to meet working capital requirements and obligations as they become due.

Commitments and Related Party Transactions

Columbus Gold, a company with certain directors and officers in common, provides the Company with administration and management services on a shared cost basis under a corporate services agreement (the "CSA"). The most recent CSA is effective until December 31, 2019 and may be terminated by either party with three months' notice.

As at September 30, 2019, the Company had a principal balance of \$1,604,405 (September 30, 2018 - \$1,604,405) owing to Columbus Gold (the "Grid Note") originally due on March 1, 2019. On March 5, 2019, the Company issued 1,000,000 common shares (the "Extension Shares") of Allegiant in exchange for extending the due date to December 31, 2020. The fair value of the Extension Shares was \$190,000 at the time of issuance.

As the Grid Note was initially a non-current liability, the Company discounted the Grid Note with a 20% annual discount rate, resulting in a discount of \$213,639 allocated to the reserves account. Upon issuing the Extension Shares, the Grid Note was recognized as a new financial liability and the fair value of the Extension Shares was recognized as a loss. The Company discounted newly issued Grid Note with a 15% annual discount rate, resulting in a discount of \$383,665 allocated to the reserves account. A continuity table of the Grid Note is as follows:

	(\$)
D'adada a	1,004,405
Principal balance	1,604,405
Fair value discount – 20%	(213,639)
Accretion for the period	178,401
Balance, September 30, 2018	1,569,167
Fair value discount – 15%	(383,665)
Accretion for the period	146,142
Balance, September 30, 2019	1,331,645

The Company engaged the services of Cordilleran Exploration LLC ("Cordex") to generate, evaluate, and explore mineral properties on behalf of the Company, primarily in Nevada. The agreement expired on June 30, 2019. Monthly payments consisted of a management fee which ranged from \$27,155 (US\$21,167) to \$28,865 (US\$22,500) and net smelter return ("NSR") royalty for Cordex on existing and new properties. The principal of Cordex was an officer and director of a subsidiary of the Company.

Management's Discussion and Analysis For the Years Ended September 30, 2019 and 2018 (Expressed Canadian Dollars)

The following is a summary of related party transactions:

	Years	Ended
	September 30, 2019 (\$)	September 30, 2018 (\$)
Amounts paid or accrued to Columbus Gold under the CSA	307,311	350,551
Management fees paid or accrued to Columbus Capital Corp., a		
corporation controlled by the Chairman of the Company	170,000	112,500
Management fees accrued to the CEO of the Company	5,250	=
Administration fees accrued to the CEO of the Company	750	-
Directors fees paid or accrued	180,000	145,000
Share-based payments for vested stocks options	53,700	-
Consulting fees paid or accrued to a former officer and director of a		
subsidiary of the Company	2,993	-
Consulting fees paid or accrued to Cordex	254,657	355,364
	974,661	963,415

On October 24, 2018, the Company issued 32,368 common shares (2017 – \$nil) to Directors of the Company to settle directors' fees accrued at a fair value of \$13 (2017 - \$nil).

The following summarizes advances and amounts payable to related parties:

	September 30, 2019 (\$)	September 30, 2018 (\$)
Due to Columbus Gold - Grid Note	(1,331,645)	(1,569,167)
Management fees advanced to Columbus Capital Corporation		25,000
Travel advances to Chairman of the Company	5,000	10,000
Amounts due to directors, included in accounts payable	(5,972)	(33,000)
	(1,332,617)	(1,567,167)

Off-Balance Sheet Arrangements

The Company has no off-balance sheet arrangements.

Proposed Transactions

There are no proposed transactions as at September 30, 2019 and the Report Date of this MD&A.

Management's Discussion and Analysis For the Years Ended September 30, 2019 and 2018 (Expressed Canadian Dollars)

Critical Accounting Estimates

The preparation of financial statements in accordance with IFRS requires management to make estimates and assumptions which affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. The Company's management reviews these estimates and underlying assumptions on an ongoing basis, based on experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Revisions to estimates are adjusted for prospectively in the period in which the estimates are revised.

Estimates and assumptions where there is risk of material adjustments to assets and liabilities in future accounting periods include the recoverability of the carrying value of exploration and evaluation assets, assumptions used in determination of share-based payments, the recoverability and measurement of deferred tax assets, decommissioning, restoration and similar liabilities and contingent liabilities.

The preparation of financial statements in accordance with IFRS requires the Company to make judgments, apart from those involving estimates, in applying accounting policies. The most significant judgments in applying the Company's financial statements include the classification of expenditures as exploration and evaluation expenditures or operating expenses and the classification of financial instruments.

New Accounting Standards Adopted During the Period

In July 2014, the IASB issued the final version of *IFRS 9 – Financial Instruments*: *Recognition and Measurement*. IFRS 9 retains but simplifies the mixed measurement model and establishes two primary measurement categories for financial assets: amortized cost and fair value. The basis of classification depends on an entity's business model and the contractual cash flow of the financial asset. Classification is made at the time the financial asset is initially recognized, namely when the entity becomes a party to the contractual provisions of the instrument.

IFRS 9 amends some of the requirements of IFRS 7 Financial Instruments: Disclosures, including added disclosures about investments in equity instruments measured at fair value in other comprehensive income, and guidance on financial liabilities and derecognition of financial instruments. The amended standard was adopted on October 1, 2018 and the impact to the Company's financial statements will be to classify its investments to fair value through profit or loss. The Company adopted IFRS 9 retrospectively without restatement of comparative amounts resulting in no material accounting impact on October 1, 2018. Future changes in the fair value of these investments will be recorded directly in profit or loss. No other differences of any significance have been noted in relation to the adoption of IFRS 9.

Changes in Accounting Policies and Standards

A number of new standards, and amendments to standards and interpretations may have a significant effect on the consolidated financial statements of the Company are as follows:

(a) IFRS 16 – *Leases* ("IFRS 16")

IFRS 16 specifies how an IFRS reporter will recognize, measure, present and disclose leases. The standard provides a single lessee accounting model, requiring lessees to recognize assets and liabilities for all leases unless the lease term is 12 months or less or the underlying asset has a low value. Lessors continue to classify leases as operating or finance, with IFRS 16's approach to lessor accounting substantially unchanged from its predecessor, IAS 17. The Company does not expect IFRS 16 to have a significant impact on the Company's financial statements. IFRS 16 was issued in January 2016 and applies to annual reporting periods beginning on or after January 1, 2019.

(b) Other

Other accounting standards or amendments to existing accounting standards that have been issued but have future effective dates are either not applicable or are not expected to have a significant impact on the Company's financial statements.

Management's Discussion and Analysis For the Years Ended September 30, 2019 and 2018 (Expressed Canadian Dollars)

Other Information

Outstanding Share Data

The Company has authorized capital of an unlimited number of common shares without par value. The table below represents Allegiant's capital structure as at the Report Date of this MD&A and September 30, 2019:

		September 30,
	Report Date	2019
Common shares issued and outstanding	61,843,850	61,843,850
Share options outstanding (exercisable at \$0.10 to \$0.60)	2,685,000	2,685,000
Warrants outstanding (exercisable at \$1.00, expire January 29, 2020)	6,994,114	6,994,114
Warrants outstanding (exercisable at \$0.60, expire January 29, 2020)	273,940	273,940

Risks and Uncertainties

Risk factors

Prior to making an investment decision, investors should consider the investment risks set out below and those described elsewhere in this document, which are in addition to the usual risks associated with an investment in a business at an early stage of development. The directors of the Company consider the risks set out below to be the most significant to potential investors in the Company, but do not represent all of the risks associated with an investment in securities of the Company. If any of these risks materialize into actual events or circumstances or other possible additional risks and uncertainties of which the Directors are currently unaware or which they consider not to be material in relation to the Company's business, actually occur, the Company's assets, liabilities, financial condition, results of operations (including future results of operations), business and business prospects are likely to be materially and adversely affected.

Exploration, development and production risks

An investment in the Company's shares is speculative due to the nature of the Company's involvement in the evaluation, acquisition, exploration and, if warranted, development and production of minerals. Mineral exploration involves a high degree of risk and there is no assurance that expenditures made on future exploration by the Company will result in new discoveries in commercial quantities.

While the Company has a limited number of specific identified exploration or development prospects, management will continue to evaluate prospects on an ongoing basis in a manner consistent with industry standards. The long-term commercial success of the Company depends on its ability to find, acquire, develop and commercially produce reserves. No assurance can be given that the Company will be able to locate satisfactory properties for acquisition or participation. Moreover, if such acquisitions or participations are identified, the Company may determine that current markets, terms of acquisition and participation or pricing conditions make such acquisitions or participations uneconomic. The Company has no earnings record, no reserves and no producing resource properties.

The Company's resource projects are in the exploration stage. Resource exploration, development, and operations are highly speculative, characterized by a number of significant risks, which even a combination of careful evaluation, experience and knowledge will not eliminate. Few properties that are explored are ultimately developed into producing mines. Unusual or unexpected formations, formation pressures, fires, power outages, labour disruptions, flooding, explosions, cave-ins, landslides and the inability to obtain suitable or adequate machinery, equipment or labour are other risks involved in the operation of mines and the conduct of exploration programs. The Company must rely upon consultants and contractors for exploration, development, construction and operating expertise. Substantial expenditures are required to establish mineral resources and mineral reserves through drilling, to develop metallurgical processes to extract the metal from mineral resources and, in the case of new properties, to develop the mining and processing facilities and infrastructure at any site chosen for mining.

Management's Discussion and Analysis For the Years Ended September 30, 2019 and 2018 (Expressed Canadian Dollars)

There is no assurance that surface rights agreements that may be necessary for future operations will be obtained when needed, on reasonable terms, or at all, which could adversely affect the business of the Company.

No assurance can be given that minerals will be discovered in sufficient quantities at any of the Company's mineral projects to justify commercial operations or that funds required for additional exploration or development will be obtained on a timely basis. Whether a mineral deposit will be commercially viable depends on a number of factors, some of which are: the particular attributes of the deposit, such as size, grade and proximity to infrastructure; metal prices which are highly cyclical; the proximity and capacity of milling facilities; and government regulations, including regulations relating to prices, taxes, royalties, land tenure, land use, importing and exporting of minerals and environmental protection. The exact effect of these factors cannot accurately be predicted, but the combination of these factors may result in the Company not receiving an adequate return on invested capital.

Additional Funding Requirements

From time to time, the Company will require additional financing in order to carry out its acquisition, exploration and development activities. Failure to obtain such financing on a timely basis could cause the Company to forfeit its interest in certain properties, miss certain acquisition opportunities, delay or indefinitely postpone further exploration and development of its projects with the possible loss of such properties, and reduce or terminate its operations. If the Company's cash flow from operations is not sufficient to satisfy its capital expenditure requirements, there can be no assurance that additional debt or equity financing will be available to meet these requirements or be available on favorable terms.

Prices, Markets and Marketing of Natural Resources

Gold is a commodity whose price is determined based on world demand, supply and other factors, all of which are beyond the control of the Company. World prices for gold have fluctuated widely in recent years. The marketability and price of natural resources which may be acquired or discovered by the Company will be affected by numerous factors beyond its control. The Company has limited direct experience in the marketing of gold.

Government regulations, including regulations relating to prices, taxes, royalties, land tenure, land use, importing and exporting of natural resources and environmental protection are all factors which may affect the marketability and price of natural resources. The exact effect of these factors cannot be accurately predicted, but any one or a combination of these factors could result in the Company not receiving an adequate return on investment for shareholders.

Environmental Risks

All phases of the natural resources business present environmental risks and hazards and are subject to environmental regulation pursuant to a variety of international conventions, and national, state and municipal laws and regulations. Environmental legislation provides for, among other things, restrictions and prohibitions on spills, releases or emissions of various substances produced in association with operations. The legislation also requires that facility sites and mines be operated, maintained, abandoned and reclaimed to the satisfaction of applicable regulatory authorities. Compliance with such legislation can require significant expenditures and a breach may result in the imposition of fines and penalties, some of which may be material. Environmental legislation is evolving in a manner expected to result in stricter standards and enforcement, larger fines and liability and potentially increased capital expenditures and operating costs. The discharge of tailings or other pollutants into the air, soil or water may give rise to liabilities to foreign governments and third parties and may require the Company to incur costs to remedy such discharge. No assurance can be given that environmental laws will not result in a curtailment of production or a material increase in the costs of production, development or exploration activities or otherwise adversely affect the Company's financial condition, results of operations or prospects.

Companies engaged in the exploration and development of mineral properties generally experience increased costs, and delays as a result of the need to comply with applicable laws, regulations and permits. The Company believes it is in substantial compliance with all material laws and regulations which currently apply to its activities.

Management's Discussion and Analysis For the Years Ended September 30, 2019 and 2018 (Expressed Canadian Dollars)

Failure to comply with applicable laws, regulations and permitting requirements may result in enforcement actions thereunder, including orders issued by regulatory or judicial authorities causing operations to cease or be curtailed and may include corrective measures requiring capital expenditures, installation of additional equipment, or remedial actions. Parties engaged in natural resource exploration and development activities may be required to compensate those suffering loss or damage by reason of its activities and may have civil or criminal fines or penalties imposed for violations of applicable laws or regulations and, in particular, environmental laws

Amendments to current laws, regulations and permits governing operations and activities of natural resources companies, or more stringent implementation thereof, could have a material adverse impact on the Company and cause increases in capital expenditures or production costs or reduction in levels of production at producing properties or require abandonment or delays in developments of new properties.

Dilution

In order to finance future operations and development efforts, the Company may raise funds through the issue of shares or securities convertible into shares. The constating documents of the Company allow it to issue, among other things, an unlimited number of shares for such consideration and on such terms and conditions as may be established by the directors of the Company, in many cases, without the approval of shareholders. The Company cannot predict the size of future issues of shares or securities convertible into shares or the effect, if any, that future issues and sales of shares will have on the price of the shares. Any transaction involving the issue of previously authorized but unissued shares or securities convertible into shares would result in dilution, possibly substantial, to present and prospective shareholders of the Company.

Regulatory Requirements

Mining operations, development and exploration activities are subject to extensive laws and regulations governing prospecting, development, production, exports, taxes, labour standards, occupational health, waste disposal, environmental protection and remediation, protection of endangered and protected species, mine safety, toxic substances and other matters. Changes in these regulations or in their application are beyond the control of the Company and could adversely affect its operations, business and results of operations.

Government approvals and permits are currently, and may in the future be, required in connection with the mineral projects in which the Company has an interest. To the extent such approvals are required and not obtained, the Company may be restricted or prohibited from proceeding with planned exploration or development activities. Failure to comply with applicable laws, regulations and permitting requirements may result in enforcement actions thereunder, including orders issued by regulatory or judicial authorities causing operations to cease or be curtailed, and may include corrective measures requiring capital expenditures, installation of additional equipment, or remedial actions. Parties engaged in mining operations may be required to compensate those suffering loss or damage by reason of the mining activities and may be liable for civil or criminal fines or penalties imposed for violations of applicable laws or regulations. Amendments to current laws, regulations and permitting requirements, or more stringent application of existing laws, could have a material adverse impact on the Company and cause increases in capital expenditures or production costs or reductions in levels of production at producing properties or require abandonment or delays in development of properties.

Reliance on Operators and Key Employees

The success of the Company will be largely dependent upon the performance of its management and key employees. The Company does not have any key man insurance policies and therefore there is a risk that the death or departure of any member of management or any key employee could have a material adverse effect on the Company. In assessing the risk of an investment in the Company's shares, potential investors should realize that they are relying on the experience, judgment, discretion, integrity and good faith of the management of the Company. An investment in the Company's shares is suitable only for those investors who are willing to risk a loss of their entire investment and who can afford to lose their entire investment.

Management's Discussion and Analysis For the Years Ended September 30, 2019 and 2018 (Expressed Canadian Dollars)

Title Matters

Although title to the properties has been reviewed by the Company, formal title opinions have not been obtained by the Company for most of its mineral properties and, consequently, no assurances can be given that there are no title defects affecting such properties and that such title will not be challenged or impaired. The acquisition of title to resource properties is a very detailed and time-consuming process. Title to, and the area of, resource claims may be disputed. There may be valid challenges to the title of any of the mineral properties in which the Company holds an interest that, if successful, could impair development and/or operations thereof. A defect could result in the Company losing all or a portion of its right, title, estate and interest in and to the properties to which the title defect relates.

Any of the mineral properties in which the Company holds an interest may be subject to prior unregistered liens, agreements or transfers or other undetected title defects. There is no guarantee that title to the properties will not be challenged or impugned. The Company is satisfied, however, that evidence of title to each of the properties is adequate and acceptable by prevailing industry standards.

Enforcement of Civil Liabilities

Certain of the Company's directors and certain of the experts named herein reside outside of Canada and, similarly, a majority of the assets of the Company are located outside of Canada. It may not be possible for investors to effect service of process within Canada upon the directors and experts not residing in Canada. It may also not be possible to enforce against the Company and certain of its directors and experts named herein judgements obtained in Canadian courts predicated upon the civil liability provisions of applicable securities laws in Canada.

Permits and Licenses

The operations of the Company will require licenses and permits from various governmental authorities. There can be no assurance that the Company will be able to obtain all necessary licenses and permits that may be required to carry out exploration and development of its projects.

Availability of Equipment and Access Restrictions

Natural resource exploration and development activities are dependent on the availability of drilling and related equipment in the particular areas where such activities will be conducted. Demand for such limited equipment or access restrictions may affect the availability of such equipment to the Company and may delay exploration and development activities. Conflict of Interest of Management

Certain of the Company's directors and officers are also directors and officers of other natural resource companies. Consequently, there exists the possibility for such directors and officers to be in a position of conflict. Any decision made by any of such directors and officers relating to the Company will be made in accordance with their duties and obligations to deal fairly and in good faith with the Company and such other companies.

Competition

The Company actively competes for acquisitions, leases, licenses, concessions, claims, skilled industry personnel and other related interests with a substantial number of other companies, many of which have significantly greater financial resources than the Company.

The Company's ability to successfully bid on and acquire additional property rights to participate in opportunities and to identify and enter into commercial arrangements with other parties will be dependent upon developing and maintaining close working relationships with its future industry partners and joint operators and its ability to select and evaluate suitable properties and to consummate transactions in a highly competitive environment.

Management's Discussion and Analysis For the Years Ended September 30, 2019 and 2018 (Expressed Canadian Dollars)

Insurance

The Company's involvement in the exploration for and development of natural resource properties may result in the Company becoming subject to liability for certain risks, and in particular unexpected or unusual geological operating conditions, including rock bursts, cave ins, fires, floods, earthquakes, pollution, blow-outs, property damage, personal injury or other hazards. Although the Company will obtain insurance in accordance with industry standards to address such risks, such insurance has limitations on liability that may not be sufficient to cover the full extent of such liabilities. In addition, such risks may not, in all circumstances be insurable, or, in certain circumstances, the Company may elect not to obtain insurance to deal with specific risks due to the high premiums associated with such insurance or other reasons. The payment of such uninsured liabilities would reduce the funds available to the Company. The occurrence of a significant event that the Company is not fully insured against, or the insolvency of the insurer or such event, could have a material adverse effect on the Company's financial position, results of operations or prospects.

No assurance can be given that insurance to cover the risks to which the Company's activities will be subject will be available at all or at economically feasible premiums. Insurance against environmental risks (including potential for pollution or other hazards as a result of the disposal of waste products occurring from production) is not generally available to the Company or to other companies within the industry. The payment of such liabilities would reduce the funds available to the Company. Should the Company be unable to fund fully the cost of remedying an environmental problem, the Company might be required to suspend operations or enter into interim compliance measures pending completion of the required remedy.

The Market Price of Shares May Be Subject to Wide Price Fluctuations

The market price of shares may be subject to wide fluctuations in response to many factors, including variations in the operating results of the Company, divergence in financial results from analysts' expectations, changes in earnings estimates by stock market analysts, changes in the business prospects for the Company, general economic conditions, changes in mineral reserve or resource estimates, results of exploration, changes in results of mining operations, legislative changes, and other events and factors outside of the Company's control.

In addition, stock markets have from time to time experienced extreme price and volume fluctuations, which, as well as general economic and political conditions, could adversely affect the market price for the shares.

The Company is unable to predict whether substantial amounts of shares will be sold in the open market. Any sales of substantial amounts of shares in the public market, or the perception that such sales might occur, could materially and adversely affect the market price of the shares.

Global Financial Conditions

Global financial conditions over the last few years have been characterized by increased volatility and several financial institutions have either gone into bankruptcy or have had to be rescued by governmental authorities. These factors may affect the ability of the Company to obtain equity or debt financing in the future on terms favourable to it. Additionally, these factors, as well as other related factors, may cause decreases in asset values that are deemed to be other than temporary, which may result in impairment losses. If such increased levels of volatility and market turmoil continue, the operations of the Company may suffer adverse impact and the price of our shares may be adversely affected.

Credit risk

Credit risk is the risk of an unexpected loss if a party to its financial instruments fails to meet its contractual obligations. The Company's financial assets exposed to credit risk will be primarily composed of cash and amounts receivable. While the Company will attempt to mitigate its exposure to credit risk, there can be no assurance that unexpected losses will not occur. Such unexpected losses could adversely affect the Company.

Management's Discussion and Analysis For the Years Ended September 30, 2019 and 2018 (Expressed Canadian Dollars)

Management's Responsibility for Financial Statements

The information provided in this report, including the financial statements, is the responsibility of management. In the preparation of these statements, estimates are sometimes necessary to make a determination of future values for certain assets or liabilities. Management believes such estimates have been based on careful judgments and have been properly reflected in the accompanying consolidated financial statements.

Disclosure and Internal Controls

Disclosure controls and procedures have been established to provide reasonable assurance that material information relating to the Company is made known to management, particularly during the period in which annual filings are being prepared. Furthermore, internal controls over financial reporting have been established to ensure the Company's assets are safeguarded and to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements in accordance with IFRS.

Caution Regarding Forward Looking Statements

This document contains certain forward-looking information and forward-looking statements, as defined in applicable securities laws (collectively referred to as "forward-looking statements"). Often, but not always, forward-looking statements can be identified by the use of words such as "plans," "expects" or "does not expect," "is expected," "planned," "budget," "scheduled," "estimates," "continues," "forecasts," "projects," "predicts," "intends," "anticipates" or "does not anticipate," or "believes," or variations of such words and phrases, or statements that certain actions, events or results "may," "could," "would," "should," "might" or "will" be taken, occur or be achieved. Forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause our actual results, performance or achievements to be materially different from any of our future results, performance or achievements expressed or implied by the forward-looking statements; consequently, undue reliance should not be placed on forward-looking statements.

These risks, uncertainties and other factors include, but are not limited to: changes in Canadian/US dollar exchange rates; management's strategies, objectives and expectations; the Company's tax position and the tax and royalty rates applicable; the Company's ability to acquire necessary permits and other authorizations in connection with its projects; risks associated with environmental compliance, including without limitation changes in legislation and regulation, and estimates of reclamation and other costs; the Company's cost reduction and other financial and operating objectives; the Company's environmental, health and safety initiatives; the availability of qualified employees and labour for operations; risks that may affect operating or capital plans; risks created through competition for mining properties; risks associated with exploration projects, and mineral reserve and resource estimates, including the risk of errors in assumptions and methodologies; risks associated with dependence on third parties for the provision of critical services; risks associated with non-performance by contractual counterparties; risks associated with title; and general business and economic conditions.

Forward-looking statements are based on a number of assumptions that may prove to be incorrect, including, but not limited to, assumptions about: general business and economic conditions; the expected timing to complete a feasibility study and other exploration milestones, the timing of the receipt of required permits and approvals for operations; the availability of equity and other financing on reasonable terms; power prices; the Company's ability to procure equipment and operating supplies in sufficient quantities and on a timely basis; the Company's ability to attract and retain skilled labour and staff; the impact of changes in Canadian/US dollar and other foreign exchange rates on costs and results; market competition; and ongoing relations with employees and with business partners and joint venturers.

We caution you that the foregoing list of important factors and assumptions is not exhaustive. Events or circumstances could cause our actual results to differ materially from those estimated or projected and expressed in, or implied by, these forward-looking statements. Management undertakes no obligation to update publicly or otherwise revise any forward-looking statements or the foregoing list of factors, whether as a result of new information or future events or otherwise, except as may be required under applicable laws.

Consolidated Financial Statements

For the Years Ended September 30, 2019 and 2018

(Stated in Canadian Dollars)

INDEPENDENT AUDITOR'S REPORT

To the Shareholders of Allegiant Gold Ltd.

Opinion

We have audited the consolidated financial statements of Allegiant Gold Ltd. (the "Company"), which comprise the consolidated statements of financial position as at September 30, 2019 and 2018, and the consolidated statements of loss and comprehensive loss, cash flows and shareholders' equity for the years then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as at September 30, 2019 and 2018, and its financial performance and its cash flows for the years then ended in accordance with International Financial Reporting Standards.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Material Uncertainty Related to Going Concern

We draw attention to Note 1 to the financial statements, which describes events or conditions that indicate that a material uncertainty exists that may cast significant doubt on the Company's ability to continue as a going concern. Our opinion is not modified in respect of this matter.

Other Information

Management is responsible for the other information. The other information comprises the information included in Management's Discussion and Analysis.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements. As part of an audit in accordance with Canadian generally accepted auditing standards, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design
 and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to
 provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than
 for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the
 override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate
 in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal
 control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and
 whether the financial statements represent the underlying transactions and events in a manner that achieves fair
 presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

The engagement partner on the audit resulting in this independent auditor's report is Rakesh Patel.

Notes to the Consolidated Financial Statements For the Years Ended September 30, 2019 and 2018 (Expressed in Canadian Dollars)

1. Nature of Operations and Going Concern

Allegiant Gold Ltd. (the "Company" or "Allegiant"), was incorporated on September 26, 2017 under the laws of the Province of British Columbia, Canada. The Company was a wholly-owned subsidiary of Columbus Gold Corp. ("Columbus Gold"), a Toronto Stock Exchange listed company, until January 25, 2018, when it was spun-out of Columbus Gold by way of a plan of arrangement (the "Arrangement") as a separate entity. The Company obtained its initial listing on the TSX Venture Exchange ("TSXV") on January 30, 2018. The common shares of the Company are also listed on the OTCQX effective February 26, 2018.

The Company's head office and principal address is located at 1090 Hamilton Street, Vancouver, British Columbia, V6B 2R9, Canada.

On October 1, 2017, the Company acquired Allegiant Gold Holding Ltd. ("AGHL") from Columbus Gold (note 5), which indirectly held all of Columbus Gold's exploration and evaluation assets in the United States of America.

The Company's principal business activities are the exploration and development of resource properties located in the United States of America. The Company is in the process of exploring and developing its resource properties, but it has not yet determined whether these properties contain ore reserves that are economically recoverable. The recoverability of the amounts shown for exploration and evaluation assets are dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain necessary financing to complete the development of those reserves and upon future profitable production or from proceeds of disposition. The Company's exploration and evaluation activities are not dependent on seasonality and may operate year-round; however, the Company may adjust the level of exploration and evaluation activities to manage its capital structure in light of changes in global economic conditions. To date, the Company has not received any revenue from mining operations and is considered to be in the exploration stage.

These consolidated financial statements have been prepared on a going concern basis which implies that the Company will continue realizing assets and discharging liabilities in the normal course of business for the foreseeable future. Should the going concern assumption not continue to be appropriate, further adjustments to carrying values of assets and liabilities may be required. At September 30, 2019, the Company had working capital of \$1,048,165 (September 30, 2018 – \$2,082,863) and deficit of \$6,249,518 (September 30, 2018 - \$3,865,015). Accordingly, the ability of the Company to realize the carrying value of its assets and continue operations as a going concern is dependent upon its ability to raise additional debt or equity to fund ongoing costs of operations and/or secure new or additional partners in order to advance its projects. These material uncertainties may cast significant doubt upon the Company's ability to continue as a going concern. These financial statements do not include any adjustments relating to the recovery of assets and classification of assets and liabilities that may arise should the Company be unable to continue as a going concern.

2. Basis of Presentation

(a) Statement of compliance

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"), and Interpretations of the International Financial Reporting Interpretations Committee ("IFRIC").

These consolidated financial statements were approved by the Board of Directors and authorized for issue on January 17, 2020.

(b) Basis of measurement

These consolidated financial statements have been prepared on the historical cost basis. In addition, these consolidated financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

Notes to the Consolidated Financial Statements For the Years Ended September 30, 2019 and 2018 (Expressed in Canadian Dollars)

2. Basis of Presentation – continued

(c) Basis of consolidation

These consolidated financial statements include the accounts of Allegiant and its wholly-owned subsidiaries as follows:

Entity	Ownership Interest	Place of Incorporation
Allegiant Gold Holding Ltd.	100%	British Columbia, Canada
Allegiant Gold (U.S.) Ltd.	100%	Arizona, USA

All inter-company transactions and balances have been eliminated upon consolidation.

Control exists where the parent entity has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. Subsidiaries are included in the consolidated financial statements from the date control commences until the date control ceases.

(d) Use of estimates and judgments

Significant estimates and assumptions

The preparation of the consolidated financial statements in accordance with IFRS requires management to make estimates and assumptions which affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. The Company's management reviews these estimates and underlying assumptions on an ongoing basis, based on experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Revisions to estimates are adjusted for prospectively in the period in which the estimates are revised.

Estimates and assumptions used by management where there is risk of material adjustments to assets and liabilities in future accounting periods include the recoverability of the carrying value of exploration and evaluation assets, assumptions used in determination of the fair value of share-based payments, the recoverability and measurement of deferred tax assets, decommissioning obligations, restoration and similar liabilities and contingent liabilities.

Significant judgments

The preparation of financial statements in accordance with IFRS requires the Company to make judgments, apart from those involving estimates, in applying accounting policies. The most significant judgments in preparing the Company's consolidated financial statements include the assumption that the Company will continue as a going concern, classification of expenditures as exploration and evaluation expenditures or operating expenses and the classification of financial instruments.

Notes to the Consolidated Financial Statements For the Years Ended September 30, 2019 and 2018 (Expressed in Canadian Dollars)

3. Significant Accounting Policies

(a) Foreign currency translation

The functional currency is the currency of the primary economic environment in which the entity operates and has been determined for each entity within the Company. The functional currencies are as follows:

Entity	Functional Currency
Allegiant Gold Ltd.	Canadian dollar
Allegiant Gold Holding Ltd.	Canadian dollar
Allegiant Gold (U.S.) Ltd.	United States dollar

At the end of each reporting period, assets and liabilities of the entities whose functional currency is not the Canadian dollar are translated at the rate of exchange at the statement of financial position date. Revenues and expenses are translated at the exchange rates approximating those in effect on the date of the transactions. Exchange gains and losses arising on translation are reflected in other comprehensive income or loss for the year.

Transactions in currencies other than the Canadian dollar are recorded at exchange rates prevailing on the dates of the transactions. At the end of each reporting period, assets and liabilities of the Company that are denominated in foreign currencies are translated at the rate of exchange at the statement of financial position date. Revenues and expenses are translated at the exchange rates approximating those in effect on the date of the transactions. Exchange gains and losses arising on translation are reflected in profit or loss for the year.

(b) Exploration and evaluation assets

Upon acquiring the legal right to explore a property, costs related to the acquisition, exploration and evaluation are capitalized by property. If commercially profitable ore reserves are developed, capitalized costs of the related exploration and evaluation assets are reclassified as mining assets and amortized using the unit of production method. If, after management review, it is determined that capitalized acquisition, exploration and evaluation costs are not recoverable over the estimated economic life of the exploration and evaluation assets, or the exploration and evaluation assets are abandoned, or management deems there to be an impairment in value, the exploration and evaluation assets is written down to its net realizable value.

Any option payments received by the Company from third parties or tax credits refunded to the Company are credited to the capitalized cost of the exploration and evaluation assets. If payments received exceed the capitalized cost of the exploration and evaluation assets, the excess is recognized as income in the year received. The amounts shown for exploration and evaluation assets do not necessarily represent present or future values. The recoverability of the exploration and evaluation asset is dependent upon the discovery of economically recoverable reserves, the ability of the Company to obtain the necessary financing to complete the development, and future profitable production or proceeds from the disposition thereof.

General exploration costs consist of exploration expenditures incurred in the process of evaluating potential property acquisitions. Such expenditures will continue to be expensed until the property is acquired.

The proceeds from royalties granted and operator fees earned are deducted from the costs of the related property and any excess is recorded as income.

Notes to the Consolidated Financial Statements For the Years Ended September 30, 2019 and 2018 (Expressed in Canadian Dollars)

3. Significant Accounting Policies - continued

(c) Impairment of long-lived assets

At each reporting date, the Company reviews the carrying amounts of its long-lived assets to determine whether there are any indications of impairment. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment, if any.

The recoverable amount of an asset is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. For the purpose of impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of cash inflows of other assets or groups of assets (the "cash-generating unit" or "CGU"). This generally results in the Company evaluating its non-financial assets on an exploration asset by exploration asset basis.

If the carrying amount of an asset or CGU exceeds its recoverable amount, the carrying amount of the asset or CGU is reduced to its recoverable amount. An impairment loss is recognized as an expense in the statement of comprehensive loss.

Impairment losses recognized in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reduced if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of amortization, if no impairment loss had been recognized.

(d) Restoration provision

The Company recognizes liabilities for statutory, contractual, constructive or legal obligations associated with the retirement of exploration and evaluation assets and equipment, when those obligations result from the acquisition, construction, development or normal operation of the assets. The net present value of future rehabilitation cost estimates arising from the decommissioning of plant and other site preparation work is capitalized to mining assets along with a corresponding increase in the restoration provision in the period incurred. Discount rates using a pre-tax rate that reflects the time value of money are used to calculate the net present value. The rehabilitation asset is depreciated on the same basis as mining assets.

The Company's estimates of reclamation costs could change as a result of changes in regulatory requirements, discount rates and assumptions regarding the amount and timing of the future expenditures. These changes are recorded directly to mining assets with a corresponding entry to the provision. The Company's estimates are reviewed annually for changes in regulatory requirements, discount rates, effects of inflation and changes in estimates. Changes in the net present value, excluding changes in the Company's estimates of reclamation costs, are charged to profit and loss for the year.

(e) Finance income and expenses

Finance income comprises interest income on funds invested (including available-for-sale financial assets, gains on the disposal of available-for-sale financial assets and changes in the fair value of financial assets at fair value through profit or loss). Interest income is recognized as it accrues in profit or loss, using the effective interest method.

Finance expense comprises interest expense on borrowings and unwinding of the discount on provisions. Borrowing costs that are not directly attributable to the acquisition, construction or production of a qualifying asset are recognized in profit or loss using the effective interest method.

(f) Income taxes

Income tax is recognized in profit or loss except to the extent that it relates to items recognized directly in equity, in which case it is recognized in equity. Current tax expense is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at period end, adjusted for amendments to tax payable with regards to previous years.

Notes to the Consolidated Financial Statements For the Years Ended September 30, 2019 and 2018 (Expressed in Canadian Dollars)

3. Significant Accounting Policies - continued

Deferred income taxes are accounted for using the liability method of tax allocation. Under this method deferred income tax assets and liabilities are recognized for the tax consequences of temporary differences by applying substantively enacted statutory tax rates applicable to future years to differences between the financial statement carrying amounts and the tax bases of existing assets and liabilities.

The effect on deferred taxes for a change in tax rates is generally recognized in income in the period that includes the substantive enactment.

A deferred tax asset is recognized to the extent that it is probable that future taxable profits will be available against which the asset can be utilized. To the extent that the Company does not consider it probable that a deferred tax asset will be recovered, the deferred tax asset is reduced.

Deferred income tax assets and liabilities are offset when they relate to income taxes levied by the same taxation authority and the Company intends to settle its current tax assets and liabilities on a net basis. Current and deferred taxes relating to items recognized directly in equity is recognized in equity and not in the statement of loss and comprehensive loss.

(g) Earnings per share

Loss per share is calculated using the weighted average number of common shares outstanding during the year. The calculation of diluted loss per share assumes that outstanding options and warrants are exercised and the proceeds are used to repurchase shares of the Company at the average market price of the shares for the period. The effect is to increase the number of shares used to calculate diluted earnings per share and is only recognized when the effect is dilutive.

(h) Share-based payments

The Company grants share-based awards, including options, as an element of compensation to directors, officers, employees and service providers. Details of the Company's share option plan are disclosed in note 10.

The Company uses the Black-Scholes Option Pricing Model to measure the fair value for all share options granted, modified or settled during the period. Compensation expense is recorded based on the fair value of the award at the grant date, amortized over the vesting period. Each reporting date prior to vesting, the cumulative expense representing the extent to which the vesting period has expired and management's best estimate of the awards that are ultimately expected to vest is computed. The movement in cumulative expense is recognised in the statement of comprehensive income or as capitalized mineral resource property cost with a corresponding entry within equity, against share-based payments reserve. No expense is recognised for awards that do not ultimately vest. When options are exercised, the proceeds received, together with any related amount in share-based payments reserve, are credited to share capital.

(i) Financial instruments

The Company's financial instruments consist of cash, short-term investments, receivables, reclamation bonds, note due to Columbus Gold Corp., and accounts payable. Upon adoption of IFRS 9 – Financial Instruments ("IFRS 9"), the Company's classification of its financial instruments is as follows:

Notes to the Consolidated Financial Statements For the Years Ended September 30, 2019 and 2018 (Expressed in Canadian Dollars)

3. Significant Accounting Policies - continued

Financial Assets	IAS 39	IFRS 9
Cash	Loans and receivables	Amortized cost
Short-term investments	Held-for-trading (FVTPL)	FVTPL
Receivables	Loans and receivables	Amortized cost
Reclamation bonds	Loans and receivables	Amortized cost
Financial Liabilities	IAS 39	IFRS 9
Accounts payable	Other financial liabilities	Amortized cost
Due to Columbus Gold Corp.	Other financial liabilities	Amortized cost

Classification

On initial recognition, the Company classifies its financial instruments in the following categories: at ("FVTPL"), at fair value through other comprehensive income (loss) ("FVTOCI") or at amortized cost.

A financial asset is measured at amortized cost if it meets both of the following conditions and is not designated as FVTPL:

- it is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A debt investment is measured at FVTOCI if it meets both of the following conditions and is not designated as FVTPL:

- it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

An equity investment that is held for trading is measured at FVTPL. For other equity investments that are not held for trading, the Company may irrevocably elect to designate them as FVTOCI. This election is made on an investment-by-investment basis.

All financial assets not classified or measured at amortized cost or FVTOCI as described above are measured at FVTPL. This includes all derivative financial assets. On initial recognition, the Company may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortized cost or at FVTOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

Financial liabilities are measured at amortized cost, unless they are required to be measured at FVTPL (such as instruments held for trading or derivatives) or the Company has elected to measure them at FVTPL.

Measurement

Financial assets at FVTOCI

Elected investments in equity instruments at FVTOCI are initially recognized at fair value plus transaction costs. Subsequently they are measured at fair value, with gains and losses recognized in other comprehensive income (loss).

Financial assets and liabilities at amortized cost

Financial assets and liabilities at amortized cost are initially recognized at fair value plus or minus transaction costs, respectively, and subsequently carried at amortized cost less any impairment.

Notes to the Consolidated Financial Statements For the Years Ended September 30, 2019 and 2018 (Expressed in Canadian Dollars)

3. Significant Accounting Policies - continued

Financial assets and liabilities at FVTPL

Financial assets and liabilities carried at FVTPL are initially recorded at fair value and transaction costs are expensed in profit or loss. Realized and unrealized gains and losses arising from changes in the fair value of the financial assets and liabilities held at FVTPL are recognized in profit or loss in the period in which they arise. Where management has opted to recognize a financial liability at FVTPL, any changes associated with the Company's own credit risk will be recognized in other comprehensive income (loss).

Impairment of financial assets at amortized cost

The Company recognizes a loss allowance for expected credit losses on financial assets that are measured at amortized cost. At each reporting date, the Company measures the loss allowance for the financial asset at an amount equal to the lifetime expected credit losses if the credit risk on the financial asset has increased significantly since initial recognition. If at the reporting date, the financial asset has not increased significantly since initial recognition, the Company measures the loss allowance for the financial asset at an amount equal to the twelve month expected credit losses. The Company shall recognize in the statement of comprehensive loss, as an impairment gain or loss, the amount of expected credit losses (or reversal) that is required to adjust the loss allowance at the reporting date to the amount that is required to be recognized.

Derecognition

Financial assets

The Company derecognizes financial assets only when the contractual rights to cash flows from the financial assets expire, or when it transfers the financial assets and substantially all of the associated risks and rewards of ownership to another entity. Gains and losses on derecognition are generally recognized in profit or loss. However, gains and losses on derecognition of financial assets classified as FVTOCI remain within accumulated other comprehensive income (loss).

Financial liabilities

The Company derecognizes financial liabilities only when its obligations under the financial liabilities are discharged, cancelled or expired. Generally, the difference between the carrying amount of the financial liability derecognized and the consideration paid and payable, including any non-cash assets transferred or liabilities assumed, is recognized in profit or loss.

4. Changes in Accounting Standards

A number of new standards, and amendments to standards and interpretations, are not yet effective for the year ended September 30, 2019, and have not been applied in preparing these consolidated financial statements. Those that may have a significant effect on the consolidated financial statements of the Company are as follows:

(a) IFRS 16 – *Leases* ("IFRS 16")

IFRS 16 specifies how an IFRS reporter will recognize, measure, present and disclose leases. The standard provides a single lessee accounting model, requiring lessees to recognize assets and liabilities for all leases unless the lease term is 12 months or less or the underlying asset has a low value. Lessors continue to classify leases as operating or finance, with IFRS 16's approach to lessor accounting substantially unchanged from its predecessor, IAS 17. The Company does not expect IFRS 16 to have a significant impact on the Company's financial statements. IFRS 16 was issued in January 2016 and applies to annual reporting periods beginning on or after January 1, 2019.

(b) Other

Other accounting standards or amendments to existing accounting standards that have been issued but have future effective dates are either not applicable or are not expected to have a significant impact on the Company's financial statements.

Notes to the Consolidated Financial Statements For the Years Ended September 30, 2019 and 2018 (Expressed in Canadian Dollars)

5. Acquisition of AGHL

On October 1, 2017, the Company issued 49 shares to Columbus Gold in exchange for all of the outstanding common shares of AGHL, which indirectly held all of Columbus Gold's exploration and evaluation assets in Nevada.

The transaction was between entities under common control as it was a transfer of assets previously owned directly by Columbus Gold to the Company, a wholly owned subsidiary of Columbus Gold at the time. Accordingly, the Company recorded the assets transferred at the historical carrying costs of Columbus Gold at the date of transfer. The carrying amounts of the assets and liabilities transferred from Columbus Gold to the Company included:

	\$
Cook	120.252
Cash	130,352
Reclamation bonds	446,906
Prepaid expenses	4,280
Exploration and evaluation assets	18,676,046
Accrued liabilities	(68,000)
Due to Columbus Gold – current	(857,500)
Due to Columbus Gold – non-current	(1,082,218)
	17,249,866

On October 29, 2017, AGHL issued 2 additional shares to Columbus Gold to settle debt outstanding of \$857,500. On October 29, 2017, the Company issued 2 additional shares to Columbus Gold in exchange for the additional 2 common shares of AGHL, and consequently retained a 100% interest in AGHL.

6. Short-term Investments

	September 30, 2019 (\$)	September 30, 2018 (\$)
Barrian Mining Corp. (note 8)	635,645	_
Barksdale Metals Corp. (note 8)	16,508	-
	652,153	-

During the year ended September 30, 2019, the Company recorded a change in fair value of short-term investments of \$33,785 (2018-\$Nil).

7. Reclamation Bonds

The drilling permits for the following properties require refundable reclamation bonds, which are held by the USA Forest Service and the US Bureau of Land Management:

	September 30, 2019 (\$)	September 30, 2018 (\$)
Bolo	-	255,063
Browns Canyon	8,373	20,391
Eastside	291,393	261,919
Hughes Canyon	18,179	17,709
Monitor Hills	15,120	14,729
Red Hills	8,070	19,646
	341,135	589,458

Notes to the Consolidated Financial Statements For the Years Ended September 30, 2019 and 2018 (Expressed in Canadian Dollars)

Exploration and Evaluation Assets

A summary of exploration and evaluation assets by property for the year ended September 30, 2019 is set out below:

	Balance at September 30,		Option Payment(s)		Foreign	Balance at September 30,

Balance at September 30, 2019	24,001,252

Bolo

The Bolo project is located approximately 60 km northeast of Tonopah, Nevada. The Company holds a 100% interest in Bolo, subject to underlying royalties.

On June 27, 2018, the Company entered into an agreement with Barrian Mining Corp. ("Barrian"), under which Barrian may acquire up to a 50.01% undivided interest in Bolo by issuing common shares of Barrian to the Company, with an aggregate value of \$1,310,000 (US\$1,000,000) over a three year period, and also incurring certain exploration and evaluation expenditures on Bolo with a minimum aggregate value of \$5,240,000 (US\$4,000,000) by December 31, 2022. On April 24, 2019, the Company received 1,672,750 common shares of Barrian, representing an initial \$334,550 (US\$250,000) option payment.

Barrian may acquire an additional 24.99% interest in Bolo by incurring an additional \$5,240,000 (US\$4,000,000) in certain exploration and evaluation expenditures on Bolo within two years of acquiring the initial 50.01% interest in Bolo. If Barrian does not acquire the additional 24.99% interest, then Barrian will transfer a 0.02% interest in Bolo back to the Company.

Eastside

The Eastside project is located approximately 32 km west of Tonopah, Nevada. The Company holds a 100% interest in Eastside, subject to underlying royalties.

Notes to the Consolidated Financial Statements For the Years Ended September 30, 2019 and 2018 (Expressed in Canadian Dollars)

8. Evaluation Assets - continued

Four Metals

On April 19, 2018 the Company and MinQuest Ltd. entered into an option agreement with Arizona Standard (US) Corp. (the "Four Metals Optionee") and Barksdale Metals Corp. ("Barksdale") granting the Four Metals Optionee an option to acquire a 100% interest in the Four Metals project located in Santa Cruz County, Arizona. The Four Metals Optionee is a wholly-owned subsidiary of Barksdale. The common shares of Barksdale are listed for trading on the TSXV. The Company and MinQuest Ltd. each own a 50% interest in 16 unpatented lode mining claims that, in addition to 24 unpatented lode mining claims that are 100% owned by the Company, comprise the Four Metals project. The option agreement requires the Four Metals Optionee to pay \$294,750 (US\$225,000) in staged payments over a five-year period. In addition, Barksdale will issue common shares with a total value of \$294,750 (US\$225,000) in staged issuances over the same five-year period. The cash payments and share issuances are shared equally with MinQuest Ltd. so that the Company will receive 50% of the cash and share payments.

On April 18, 2019, the Company received cash of \$16,670 (US\$12,500) and 33,016 common shares of Barksdale, with a fair value of \$16,838 (US\$12,500). On April 19, 2018, the Company received cash of \$16,670 (US\$12,500).

Mogollon

On June 19, 2018, the Company entered into an agreement with Barrian, granting Barrian an option to acquire a 100% interest in Mogollon by issuing common shares of Barrian with an aggregate value of \$1,310,000 (US\$1,000,000) over an approximate three-year period. On April 24, 2019, the Company received 1,672,750 common shares of Barrian, representing an initial \$334,550 (US\$250,000) option payment.

Other

The Company has additional exploration and evaluation assets located in the USA, comprised of the following properties: Clanton Hills, Browns Canyon, Overland Pass, Goldfield West, White Horse Flats, and White Horse North.

9. Restoration Provision

The Company has restoration obligations in connection with certain properties in Nevada. The Company has in place reclamation bonds with the USA Forest Service and the US Bureau of Land Management (also refer to note 7) to cover these obligations.

10. Share Capital

(a) Common shares

Authorized - unlimited common shares without par value.

At September 30, 2019, the Company had 61,843,850 (September 30, 2018 – 60,811,482) common shares issued and outstanding.

On March 5, 2019, the Company issued 1,000,000 common shares (the "Extension Shares") of Allegiant in exchange for extending the due date of the Grid Note to December 31, 2020 (see note 11). The fair value of the Extension Shares was \$190,000 at the time of issuance.

On October 24, 2018, the Company extinguished an existing debt in the amount of \$13,595 by issuing 32,368 common shares (each a "Settlement Share") at a fair value price of \$0.42 per Settlement Share to certain of its independent directors.

On July 16, 2018 and August 14, 2018, the Company closed two tranches of a non-brokered private placement wherein it issued 14,130,001 common shares at a price of \$0.35 per share for aggregate gross proceeds of \$4,945,500. Issuance costs totaling \$364,251 were paid in connection with the private placement.

Notes to the Consolidated Financial Statements For the Years Ended September 30, 2019 and 2018 (Expressed in Canadian Dollars)

10. Share Capital

On January 25, 2018, the Company was spun-out of Columbus Gold under the Arrangement through the issuance of 39,687,315 common shares of the Company to Columbus Gold and its shareholders.

On December 8, 2017, the Company closed brokered and non-brokered private placements of subscription receipts (the "Subscription Receipts") for combined gross proceeds of \$4,196,468. Share issuance costs related to this private placement were \$425,301. Each Subscription Receipt entitled the holder to receive, upon closing of the Arrangement, one common share of Allegiant and one common share purchase warrant ("Allegiant Warrant"). On January 29, 2018, 6,994,114 Subscription Receipts were converted to 6,994,114 common shares of the Company and 6,994,114 Allegiant Warrants. The warrants had a fair value of \$1,516,063 (see note 10c). In addition, there was 273,490 finder's warrants that were issued (see note 10c).

During October 2017, the Company issued 51 common shares, with a fair value of \$18,107,406, to Columbus Gold in exchange for all of the outstanding common shares of AGHL, which indirectly held all of Columbus Gold's exploration and evaluation assets in Nevada.

(b) Share options

The Company has a share option plan to issue share options whereby the total share options outstanding may be up to 10% of its issued capital at the time of an applicable option grant. The Board of Directors may from time to time, grant options to directors, officers, employees or consultants. The exercise price of an option is not less than the closing price on the TSXV on the last trading day preceding the grant date.

The continuity of the Company's share options is as follows:

	Weighted Avera		
	Number of	Exercise Price	
	Options	(\$)	
Balance, October 1, 2017	_	_	
Granted	5,415,000	0.58	
Cancelled	(125,000)	0.60	
Forfeited	(200,000)	0.60	
Balance, September 30, 2018	5,090,000	0.58	
Granted	1,000,000	0.10	
Cancelled	(3,000,000)	0.57	
Expired	(405,000)	0.60	
Balance, September 30, 2019	2,685,000	0.41	

A summary of the Company's options at September 30, 2019 is as follows:

Options Outstanding			Options Exerc	exercisable	
Exercise	Number of	Weighted Average Remaining	Number of	Weighted Average Remaining	
Price Options (\$) Outstanding	Contractual Life (years)	Options Exercisable	Contractual Life (years)		
0.60	1,685,000	3.34	1,685,000	3.34	
0.10	1,000,000	4.98	1,000,000	4.98	
0.10-0.60	2,685,000	3.95	2,685,000	3.95	

Notes to the Consolidated Financial Statements For the Years Ended September 30, 2019 and 2018 (Expressed in Canadian Dollars)

10. Share Capital - continued

The fair value of share options recognized as an expense during the year ended September 30, 2019 was \$53,700 (2018 – \$1,647,277).

The fair value of each share option is estimated on the date of grant using the Black-Scholes Option Pricing Model that uses the assumptions noted in the table below. Expected volatilities are based on historical volatility of the Company's shares, and other factors. The expected term of share options granted represents the period of time that share options granted are expected to be outstanding. The risk-free rate of periods within the contractual life of the share option is based on the Canadian government bond rate. Assumptions used for share options granted during the years ended September 30, 2019 and 2018 were as follows:

Grant Date	Number of Share Options	Expected Price Volatility	Risk Free Interest Rate	Expected Life (years)	-	Fair Value Per Option (\$)	Total Fair Value (\$)
January 30, 2018	4,665,000	69.5%	2.0%	2.96	-	0.34	1,588,487
September 13, 2018	750,000	73.7%	2.2%	2.96	_	0.23	169,507
September 20, 2019	1,000,000	114.0%	1.4%	5.00	-	0.05	53,700

(c) Warrants

On January 29, 2018, in connection with the conversion of the Subscription Receipts, the Company issued 6,994,114 Allegiant Warrants, exercisable for a period of 24 months to acquire one Allegiant common share at a price of \$1.00 per share. The expiry of the Allegiant Warrants may be accelerated by the Company, at any time in the event that the volume-weighted average closing price of the Allegiant common shares on the TSXV, or such other exchange on which the Allegiant common shares may primarily trade from time to time, is greater than or equal to \$1.20 for a period of 20 consecutive trading days, by giving notice to the holders thereof, and in such case, the Allegiant Warrants will expire on the earlier of: (i) the 30th day after the date on which such notice is given by Allegiant, and (ii) the actual expiry date of the Allegiant Warrants.

On January 29, 2018, 273,490 finders' warrants (the "Finders' Warrants") were issued with an exercise price of \$0.60, expiring on January 29, 2020.

The continuity of the Company's warrants is as follows:

	Number of Warrants	Weighted Average Exercise Price (\$)
Balance, October 1, 2017	-	-
Allegiant Warrants	6,994,114	1.00
Finders' Warrants	273,490	0.60
Balance, September 30, 2019 and 2018	7,267,604	0.98

The fair value of each warrant is estimated on the date of grant using the Black-Scholes Option Pricing Model that uses the assumptions noted in the table below. Expected volatilities are based on historical volatility of the Company's shares, and other factors. The expected term of warrants issued represents the period of time which those warrants are expected to be outstanding. The risk-free rate of periods within the contractual life of the warrants is based on the Canadian government bond rate.

Notes to the Consolidated Financial Statements For the Years Ended September 30, 2019 and 2018 (Expressed in Canadian Dollars)

10. Share Capital - continued

Assumptions used for warrants issued during 2018 are as follows:

Issue Date1	Number of Warrants	Expected Price Volatility	Risk Free Interest Rate	Expected Life (Years)	Expected Dividend Yield	Fair Value Per Warrant (\$)	Total Fair Value (\$)
January 29, 2018	6,994,114	75%	1.77%	2.00	-	0.20	1,432,234
January 29, 2018	273,490	75%	1.77%	2.00		0.31	83,833

(d) Loss per share

	Year E	nded
	September 30, 2019 (\$)	September 30, 2018 (\$)
Basic and diluted loss per share Net loss for the year	(0.04) (2,384,503)	(0.11) (3,865,015)

	Year Ended		
	September 30, 2019 (\$)	September 30, 2018 (\$)	
	(1)	(1)	
Shares outstanding, beginning of period	60,811,482	1	
Effect of shares issued to acquire AGHL	-	51	
Effect of the Arrangement	-	27,726,754	
Effect of common shares issued for cash	-	2,551,337	
Effect of common shares issued to settle debt	30,328	-	
Effect of common shares issued to extend the Columbus Gold loan	575,342	-	
Effect of Subscription Receipts conversion	-	4,694,679	
Basic and diluted weighted average number of shares outstanding	61,417,153	34,972,822	

As at September 30, 2019, there were 2,685,000 (September 30, 2018 - 5,090,000) share options and 7,267,604 (September 30, 2018 - 7,267,604) warrants that were potentially dilutive but not included in the diluted loss per share calculation as the effect would be anti-dilutive.

(e) Reserves

Share options and warrants

The share options and warrants reserve records items recognized as stock-based compensation expense and other share-based payments until such time that the stock options or warrants are exercised, at which time the corresponding amount will be transferred to share capital.

Accumulated other comprehensive income (loss)

The accumulated other comprehensive income (loss) reserve records unrealized exchange differences arising on translation of foreign operations that have a functional currency other than the Company's reporting currency.

Notes to the Consolidated Financial Statements For the Years Ended September 30, 2019 and 2018 (Expressed in Canadian Dollars)

10. Share Capital - continued

Other Reserves

The fair value of the extension of the Grid Note owing to Columbus Gold Corp. was determined to be \$383,665 using a discount rate of 15%. It has been recognized in other reserves as a contribution to equity.

11. Related party transactions

Columbus Gold, a company with certain directors and officers in common, provides the Company with administration and management services on a shared cost basis under a corporate services agreement (the "CSA"). The most recent CSA is effective until December 31, 2019.

As at September 30, 2019, the Company had a principal balance of \$1,604,405 (September 30, 2018 - \$1,604,405) owing to Columbus Gold (the "Grid Note") originally due on March 1, 2019. On March 5, 2019, the Company issued 1,000,000 common shares (the "Extension Shares") of Allegiant in exchange for extending the due date to December 31, 2020. The fair value of the Extension Shares was \$190,000 at the time of issuance.

As the Grid Note was initially a non-current liability, the Company discounted the Grid Note with a 20% annual discount rate, resulting in a discount of \$213,639 allocated to the reserves account. Upon issuing the Extension Shares, the Grid Note was recognized as a new financial liability and the fair value of the Extension Shares was recognized as a loss. The Company discounted newly issued Grid Note with a 15% annual discount rate, resulting in a discount of \$383,665 allocated to the reserves account. A continuity table of the Grid Note is as follows:

	(\$)
Principal balance	1,604,405
Fair value discount – 20%	(213,639)
Accretion for the period	178,401
Balance, September 30, 2018	1,569,167
Fair value discount – 15%	(383,665)
Accretion for the period	146,142
Balance, September 30, 2019	1,331,645

The Company engaged the services of Cordilleran Exploration LLC ("Cordex") to generate, evaluate, and explore mineral properties on behalf of the Company, primarily in Nevada. The agreement expired on June 30, 2019. Monthly payments consisted of a management fee which ranged from \$27,155 (US\$21,167) to \$28,865 (US\$22,500) and net smelter return ("NSR") royalty for Cordex on existing and new properties. The principal of Cordex is a former officer and director of a subsidiary of the Company.

Notes to the Consolidated Financial Statements For the Years Ended September 30, 2019 and 2018 (Expressed in Canadian Dollars)

11. Related party transactions - continued

The following is a summary of related party transactions:

	Year Ended	
	September 30, 2019	September 30, 2018
	(\$)	(\$)
Amounts paid or accrued to Columbus Gold under the CSA	307,311	350,551

13. Financial Risk and Capital Management

Financial risk

The Company's financial instruments are exposed to certain financial risks. The risk exposures and the impact on the Company's financial instruments at September 30, 2019 are summarized below. The Board of Directors periodically reviews with management the principal risks affecting the Company and the systems that have been put in place to manage these risks.

(a) Credit risk

The credit risk exposure on cash is limited to its carrying amount at the date of the statements of financial position. Cash is held as cash deposits with creditworthy banks in Canada and the USA, and risk is assessed as low.

The credit risk exposure on reclamation bonds is limited to its carrying amount at the date of the statements of financial position. Reclamation bonds are held by the USA Forest Service and the US Bureau of Land Management, and risk is assessed as low.

(b) Liquidity risk

Liquidity risk arises from the Company's general and capital financing needs. The Company manages liquidity risk by attempting to maintain sufficient cash balances. Liquidity requirements are managed based on expected cash flows to ensure that there is sufficient capital in order to meet short term obligations. As at September 30, 2019, the Company had a working capital of \$1,048,165 (September 30, 2018 – \$2,082,863).

Liquidity risk is assessed as high.

(c) Market risks

(i) Foreign currency risk

The Company's functional currency is the Canadian dollar. The Company is exposed to the currency risk related to the fluctuation of foreign exchange rates in its US subsidiary, Allegiant Gold (U.S.) Ltd. The Company also has certain assets and liabilities denoted in US dollars. A significant change in the currency exchange rates between the Canadian dollar relative to the US dollar could have an effect on the Company's results of operations, financial position and/or cash flows. The Company has not hedged its exposure to currency fluctuations.

(ii) Commodity price risk

The Company's ability to raise capital to fund exploration or development activities is subject to risks associated with fluctuations in the market price of gold. The Company closely monitors commodity prices to determine the appropriate course of action to be taken.

(iii) Interest rate risk

The Company does not have any variable interest-bearing debt and is therefore not exposed to interest rate risk.

Sensitivity analysis

A 1% change in interest rates does not have a material effect on the Company's profit or loss.

The Company has certain assets and liabilities in US Dollars, a currency other than the functional currency of Company. The Company estimates that a $\pm 10\%$ change in the value of the Canadian dollar relative to the US dollar does not have a material effect on the Company's profit or loss.

Notes to the Consolidated Financial Statements For the Years Ended September 30, 2019 and 2018 (Expressed in Canadian Dollars)

13. Financial Risk and Capital Management - continued

Capital management

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to pursue the development of its mineral properties and to maintain a flexible capital structure for its projects for the benefit of its stakeholders. As the Company is in the exploration stage, its principal source of funds is from equity financings and debt from Columbus Gold.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares, enter into joint venture property arrangements, acquire or dispose of assets or adjust the amount of cash and investments.

Fair value

The fair value of the Company's financial instruments, including cash, short-term investments, receivables and accounts payable, approximates their carrying value due to the immediate or short-term maturity of these financial instruments. The fair value of the reclamation bonds approximates their fair value based on current interest rates and high liquidity.

The fair value of the short-term investments are measured using level 1 of the fair value hierarchy.

The fair value of non-current amounts due to Columbus Gold are based on the fair value of the common shares issued as consideration for an extension.

IFRS 9, Financial Instruments: Disclosure establishes a fair value hierarchy that prioritizes the input to valuation techniques used to measure fair value as follows:

- Level 1 quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2 inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and
- Level 3 inputs for the asset or liability that are not based on observable market data (unobservable inputs).

At September 30, 2019, amounts due to Columbus Gold are categorized as Level 2 in the fair value hierarchy above.

The Company has determined the estimated fair values of its financial instruments based upon appropriate valuation methodologies.

Notes to the Consolidated Financial Statements For the Years Ended September 30, 2019 and 2018 (Expressed in Canadian Dollars)

14. Income taxes

Income tax expense differs from the amount that would result from applying the Canadian federal and provincial income tax rates to loss before income taxes. These differences result from the following items:

	Year ended	
	September 30, 2019 (\$)	September 30, 2018 (\$)
Loss before taxes	(2,384,503)	(3,865,015)
Canadian federal and provincial income tax rates	27%	27%
Expected income tax expense (recovery)	(643,800)	(1,043,600)
Foreign tax differences, rate changes and foreign exchange	1,311,900	(171,000)
Non-taxable items	139,800	494,800
Share issue costs	-	(213,200)
Change in valuation of deferred tax assets	(807,900)	933,000
Income tax (recovery) expense	-	-

The Company has the following deductible temporary differences for which no deferred tax asset has been recognized:

	September 30, 2019 (\$)	September 30, 2018 (\$)
Net operating losses carried forward	5,728,400	8,161,200
Share issuance costs	75,800	170,500
Investments	4,600	· -
Resource properties costs	(3,377,200)	(5,092,300)
Valuation allowance	(2,431,600)	(3,239,400)
	-	

As of September 30, 2019, the Company has Canadian tax loss carry-forwards of approximately \$1,920,200 (2018 - \$1,165,800) available to reduce future years' taxable income. The Company recognizes the benefit of tax losses only to the extent of anticipated future taxable income in the relevant jurisdictions. The Company's tax loss carry-forwards will expire, if not utilized as follows:

	Canada (CDN\$)
September 30, 2034	4,100
September 30, 2035	3,600
September 30, 2036	3,500
September 30, 2037	111,100
September 30, 2038	982,200
September 30, 2039	815,700
	1,920,200

In addition, the Company has non-capital losses in its United States subsidiary which will expire over various terms. The amount of those non-capital losses carried forward is \$24,809,300 (US\$18,741,000).

As at September 30, 2019, there is no material taxable temporary differences associated with the Company's investment in subsidiaries.

Notes to the Consolidated Financial Statements For the Years Ended September 30, 2019 and 2018 (Expressed in Canadian Dollars)

15. Supplemental Cash Flow Information

On April 24, 2019, the Company received 1,672,750 common shares of Barrian, representing an initial \$334,550 (US\$250,000) option payment for the Bolo property (note 8).

On April 24, 2019, the Company received 1,672,750 common shares of Barrian, representing an initial \$334,550 (US\$250,000) option payment for the Mogollon property (note 8).

On April 18, 2019, the Company received 33,016 common shares of Barksdale with a fair value of \$16,838, in connection with the Four Metals property (note 8).
