Allegiant Gold Ltd.

Management's Discussion and Analysis
Year Ended September 30, 2022
(Expressed Canadian Dollars)

This Management's Discussion and Analysis ("MD&A") focuses on significant factors that have affected Allegiant Gold Ltd. (the "Company" or "Allegiant") and its subsidiaries' performance and such factors that may affect its future performance. This MD&A should be read in conjunction with the Company's audited annual consolidated financial statements and related notes for the year ended September 30, 2022 which were prepared in accordance with International Financial Reporting Standards ("IFRS"), as issued by the International Accounting Standards Board ("IASB"). All figures in this MD&A are expressed in Canadian Dollars unless otherwise noted. The information contained in this MD&A is current to the Report Date as defined on the cover page.

Forward looking information

This MD&A contains "forward-looking information and statements" that are subject to risk factors set out under the caption *Caution regarding forward looking statements* later in this document. The reader is cautioned not to place undue reliance on forward-looking statements.

Profile and Strategy

Allegiant was incorporated on September 26, 2017 under the laws of the Province of British Columbia, Canada. The Company obtained its initial listing on the TSX Venture Exchange ("TSXV") on January 30, 2018. The common shares of the Company are also listed on the OTCQX effective February 26, 2018.

The Company's head office address is located at 1090 Hamilton Street, Vancouver, British Columbia, V6B 2R9, Canada.

The Company's principal business activities are the acquisition, exploration and development of resource properties, with gold as a principal focus. The Company is in the process of exploring and developing its resource properties but has not yet determined whether the properties contain ore reserves that are economically recoverable. The Company maintains active generative (prospecting) and evaluation programs and, as a key element of its strategy, broadens exposure, diversifies funding sources and minimizes risk through joint ventures on selected projects.

The Company's financial condition is affected by general market conditions and conditions specific to the mining industry. These conditions include, but are not limited to, the price of gold and accessibility of debt or equity financing.

Overall Performance and Updates

The following highlights the Company's overall performance for the three and twelve month periods ended September 30, 2022 and 2021:

	<u>Three Months Ended</u>			<u>Year Months Ended</u>		
	<u>September 30, 2022</u>	<u>September 30, 2021</u>	<u>Change</u>	<u>September 30, 2022</u>	<u>September 30, 2021</u>	<u>Change</u>
	(\$)	(\$)	(\$)	(\$)	(\$)	(\$)

Foreign exchange	332,359
Balance at September 30, 2022	28,318,678

Eastside

The Eastside project is located approximately 32 km west of Tonopah, Nevada. The Company holds a 100% interest in Eastside, subject to underlying royalties which include a 2% royalty to Cordilleran Exploration Co, LLC ("Cordex"), a company in which Andy Wallace is a principal.

In July 2021, the Company entered into a lease agreement (the "Hilger Agreement"), with option to purchase, for 84 mineral claims (the "Hilger Property") located adjacent to the Eastside project. The terms of the lease require escalating cash and common share payments over the initial six years with the subsequent years having a fixed aggregate annual payments of US\$75,000. The first two years of lease payments totaling US\$60,000 were settled through the issuance of 163,733 common shares of the Company valued at subsequent to year end.

The lease has a term of ten years with a renewal option for two additional ten year periods at the election of the Company.

At any time during the term of the lease, the Company has the option to purchase the Hilger Property for a cash payment of US\$750,000. On exercise of the option, the vendor will retain a 3% net smelter return royalty on production from the property, and the lease will terminate. The Company has the option to reduce the royalty by 2% in instalments of 1% each for payments of US\$1,000,000 per instalment. The Company must expend a minimum of US\$350,000 in expenditures on the Hilger Property before the fifth anniversary of the effective date of the Hilger Agreement, unless the option is exercised or the Hilger Agreement is terminated.

Allegiant Gold Ltd.

Management's Discussion and Analysis

Year Ended September 30, 2022

(Expressed Canadian Dollars)

On January 27, 2020, the Company announced an updated Inferred Resource Estimate for the Eastside gold project in Nevada. The updated resource estimate ("Updated Resource Estimate and NI 43-101 Technical Report, Eastside and Castle Gold-Silver Project Technical Report, Esmeralda County, Nevada") was conducted by Mine Development Associates ("MDA") of Reno, Nevada with an effective date of December 30, 2019. Contained pit-constrained Inferred Resources of 996,000 Au ounces and 7,838,000 Ag ounces were calculated in accordance with NI 43-101. The MDA Technical Report was subsequently revised, dated July 30, 2021, and was filed on SEDAR. This report builds on and supersedes the NI 43-101 reports of Ristorcelli (December 2016) and Ristorcelli (July 2017) titled "*Resource Estimate and Technical Report, Eastside Gold-Silver Project, Esmeralda County, Nevada*" prepared for Allegiant with an Effective Date of July 25, 2017.

Preliminary metallurgical studies conducted by Kappes, Cassiday and Associates, in Reno, Nevada, indicate the mineralization is amenable to recovery by cyanidation. Heap-leach extractions are expected to be around 70% and 20% for gold and silver, respectively, but likely would require crushing. Milling with a fine grind is expected to result in extractions over 90% for gold and approximately 50% silver.

Ongoing field work at Eastside has generated a significant number of new targets from both geologic and alteration mapping, combined with geochemical sampling. Allegiant has determined that the Original Zone, Targets 1, 2, and 6, are actually part of a large and continuous zone or cell of hydrothermal alteration, which extends for 5.5 km north and south, and is about 1-2 km wide. The Original Zone, where essentially all drilling has occurred to date, lies completely within this large cell of hydrothermal alteration. The cell provides abundant drill targets for future drilling. In addition, geochemical targets exist at Targets 3, 5, and 7. Further, the east flank on the Allegiant claim block is "pediment" in nature, where only a few small bedrock exposures are present and rocks are mostly covered with a thin veneer (10-20 m) of alluvium. As announced back in December 2019, the Board, as part of its 2020 Exploration Budget, has approved an expansion of the permitted operating zone from the current 601 acres to approximately 3,600 acres in order to better understand and target these additional areas that warrant further exploration.

In April 2021, the Company completed 49 exploration reverse circulation ("RC") drill holes, totalling 5,850 metres, drilled in the Castle zone around the former-producing Boss mine, located within the Eastside gold project. The shallow at-surface mineralization at the Castle zone is important for the Eastside project for the following reasons:

- Potential increase in contained ounces;
- Potential for reasonably low strip-ratio mining;
- Potential starter pit for a future Eastside mine.

The drilling encountered shallow gold mineralization, best described as a blanket-like zone, that commences at an approximate depth of between zero and 30 metres and continues for 20 to 40 metres in thickness. Gold is hosted in Tertiary andesite and rhyolite tuff, associated with quartz stockworks, iron oxides along fractures, argillization, and occasionally massive silicification. The Tertiary volcanic rocks overlie Paleozoic rocks of the Palmetto formation, which were encountered at depth in nearly all the drill holes. Drill intercepts (using a 0.1-gram-per-tonne-gold cut-off) for the 49 holes. Most of the holes were angle holes drilled in a variety of directions at a dip of 45 degrees. Essentially all of the mineralization was deemed as oxide visually.

Forty-seven holes encountered mineralization within 45 metres of surface. Some of the highlights include:

- 5 metres of 1.85 grams per tonne from hole ES-196;
- 14 metres of 1.08 grams per tonne from hole ES-202;
- 4.5 metres of 2.32 grams per tonne from hole ES-211;
- 3.6 metres of 2.00 grams per tonne from hole ES-216;
- 1.5 metres of 3.86 grams per tonne from hole ES-222.

In addition, the company staked an additional 194 claims that it believes are of strategic importance in relation to its new discovery known as the East Pediment Prospect.

Allegiant Gold Ltd.

Management's Discussion and Analysis

Year Ended September 30, 2022

(Expressed Canadian Dollars)

In May 2021, the Company announced that it had encountered several high-grade gold intercepts in the Original Pit zone. Gold and silver at the Original Pit zone are hosted mainly in young rhyolite domes and dikes cutting through andesite flows and lahar, lacustrine tuffs, and rhyodacite flows and plugs. Approximately 85% of the drilled gold intercepts are hosted in rhyolite. Important alteration includes multiple generations of quartz in stock works, replacement illite, adularia (both as flooding and in veins), and a variety of iron oxides mostly filling fractures. The domes at the Original Pit are the northernmost two of a highly prospective dome field, elongated north-to-south, and measuring 10 kilometres by two km. The dome field contains 41 separate domes and is entirely covered by Allegiant's claim block. Higher grade intercepts in Drill Hole 243 appear to be associated with stronger quartz veining than usual. Future work programs in the Original Pit zone will focus on defining the extent of this high-grade zone to better understand the implications on resource growth and mine planning and economics.

Highlights of the nine-hole (3,673 metre) RC drill program include:

- **Hole 243 included 2.55 g/t gold over 147.8 metres (3.17 g/t Au over 117.3 m);**
- **Hole 243 is the best drill intercept to date at the Eastside project;**
- **Hole 243 was a 100-metre step-out from the closest hole in the Original Pit and is open west, east and south;**
- **Hole 243 is well within an open pit modelling scenario;**
- **Significant silver intercepts in holes 243 and 239;**
- **Strong gold intercepts in holes 239, 243, 244 and 245;**
- **Mineralization encountered in seven of nine holes;**
- **Eastside remains open in all directions and at depth in both the Original Pit zone and the Castle zone.**

Over 284 metres of the 428 metres drilled in Hole 243 were mineralized, and utilizing a 0.10 g/t Au cut-off, 2.55 g/t Au over 147.8 metres and 3.17 g/t Au over 117.3 m using a 0.20 g/t Au cut-off) commencing from a downhole depth of 172 metres. Further significant gold mineralization was encountered in Hole 239, Hole 244 and Hole 245 including the following highlights:

- **Hole 239 -- 111.3 metres of 1.45 g/t Au including 3.1 metres of 39 g/t Au at the bottom of the hole;**
- **Hole 244 -- 76 metres of the hole is mineralized, including 6.1 metres of 1.48 g/t Au at 375 metres downhole depth;**
- **Hole 245 – 15.2 metres of 3.4 g/t Au from relatively shallow depths commencing at a downhole depth of 177 metres**

Silver intercepts were also encountered during this most recent drilling program. Using a 10 g/t Ag cut-off, Hole 239 encountered 6.1 metres of 113.35 g/t Ag at the bottom of the hole. Hole 243, reported an intercept of 93.3 g/t Ag over 44.2 metres at a downhole depth of 184 metres. The Original Pit zone at Eastside hosts approximately 7,800,000 ounces of silver as reported in the NI 43-101 Eastside Technical Report, dated January 30, 2021. Allegiant continues to believe that there remains upside potential to discover additional silver on the property, though gold continues to be the primary mineralization.

In May and June 2022, the Company completed a 32 hole, 6,703 metre RC drill program designed to test new exploration targets at Eastside focusing on the east pediment (21 holes) and the west anomaly (11 holes). The targets lie to the east and west of the Original Pit zone and were based on geophysical and geochemical anomalies. Drilling was conducted by Boart Longyear using a Foremost MPD 1500, track-mounted rig.

In September 2022, the Company a seven- hole, 3,457 metre diamond drill program designed to test the high-grade zone discovered during the May 2021 drill program completed within the Original Pit zone at Eastside. Drilling highlights included:

- 9.9 grams per tonne gold over 1.5 metres (including 23 grams per tonne silver) and 5.3 g/t Au over 1.5 m within a broader intercept of 0.63 g/t Au over 99 m at hole ES-280;
- One g/t Au over 12 m at hole ES-281;
- One g/t Au over 49 m at hole ES-282;
- Two g/t Au over nine m at hole ES-285 within a broader intercept of 0.46 g/t Au over 105 m.

Allegiant Gold Ltd.

Management's Discussion and Analysis

Year Ended September 30, 2022

(Expressed Canadian Dollars)

Bolo

The Bolo project is located approximately 60 km northeast of Tonopah, Nevada. The Company holds a 100% interest in Bolo, subject to underlying royalties.

On June 27, 2018, the Company entered into an agreement with New Placer Dome Gold Corp. ("NGLD") (formerly Barrian Mining Corp.), under which NGLD may acquire up to a 50.01% undivided interest in Bolo by issuing common shares of NGLD to the Company, with an aggregate value of \$1,310,000 (US\$1,000,000) over a three year period, and also incurring certain exploration and evaluation expenditures on Bolo with a minimum aggregate value of \$5,240,000 (US\$4,000,000) by December 31, 2022. On April 24, 2019, the Company received 1,672,750 shares of NGLD, representing an initial \$334,550 (US\$250,000) option payment. On January 29, 2020, the Company received 2,059,219 common shares of NGLD, based on a volume weighted average price, representing the first anniversary \$270,077 (US\$250,000) share option payment. On December 23, 2020, the Company received 1,170,483 common shares of NGLD, based on a volume weighted average price, representing the second anniversary \$351,145 (US\$250,000) share option payment. On December 17, 2021, the Company received 1,608,350 common shares of NGLD, based on a minimum price of \$0.20, representing the third anniversary \$144,752 share option payment.

On December 30, 2021, the Company received \$320,750 (US\$250,000) in cash and 2,402,119 valued at \$192,170 (US\$150,000) from NGLD in connection with the Bolo option agreement. The cash and share payments totaling US\$400,000 were accepted by the Company in lieu of the exploration and evaluation expenditures that were required to be expended by NGLD before December 31, 2021.

Within 30 days of the completion of the initial option, NGLD must notify the Company in writing of its intention to earn an additional 24.99% interest in Bolo. This can be accomplished by incurring an additional \$5,240,000 (US\$4,000,000) in certain exploration and evaluation expenditures on Bolo within two years of acquiring the initial 50.01% interest in Bolo. If NGLD does not acquire the additional 24.99% interest, then NGLD will transfer a 0.02% interest in Bolo back to the Company.

During September 2019, NGLD completed a 10-hole reverse circulation drill program for a total of 1,838 metres. Seven of the drill holes, totalling 1,338 metres, were completed at the South mine fault zone, testing the extent of mineralization down dip and along strike. Previous RC drill intercepts at the South mine fault area include drill hole BL-38 that graded 3.24 grams per tonne (g/t) gold over 30.5 metres within a broader zone of mineralization averaging 1.28 g/t gold over 133 metres.* One drill hole, totalling 177 metres, was completed between the South mine fault zone and Northern extension zone, testing both the continuity of mineralization along strike between the known zones, and a linear conductive anomaly identified by the 2019 induced polarization and resistivity geophysical survey. Two drill holes, totalling 323 metres, were completed at the historical Uncle Sam patented claim which has yielded high-grade silver plus gold channel rock chip samples including 3,146 g/t silver and 1.0 g/t gold over 2.6 metres, and 365 g/t silver and 1.9 g/t gold over 3.6 metres.** Uncle Sam hosts high-grade silver plus gold mineralization at surface and in drill samples, and is the site of historical (circa 1880s) mine workings.

* The true width of mineralization is estimated to be approximately 50 per cent of drilled width.

** The true width of mineralization at Uncle Sam is unknown. For full descriptions of the Bolo property mineralized intercepts see: "Technical Report on the Bolo Property, Nye County, Nevada, USA" effective date Oct. 5, 2018, available at SEDAR

On July 23, 2020, NGLD announced the commencement of its 2020 summer drilling program at Bolo. In October 2020, the results from five reverse circulation ("RC") drill holes were released and stated that they have intersected significant oxide gold mineralization and expanded gold mineralization to depth. The South Mine fault zone remains open and has seven additional expansion drilling holes awaiting laboratory assay results.

On December 22, 2021, NGLD announced the commencement of a diamond drill program at the Bolo gold-silver project. In total, two core drill holes were completed, but no significant gold values were returned. However, zones of mineralized, oxidized, decalcified, silicified, and brecciated Windfall Formation were intersected, coincident with pathfinder (As plus or minus Ba plus or minus Sb) geochemical anomalies that indicate persistence of the mineralizing system at depth. Structural data collected from oriented core measurements provided valuable data that be used in the development of a 3D geological model for the South Mine Fault.

In May 2022, NGLD was acquired by Copaur Minerals Inc. ("CPAU"), an exploration company listed on the TSXV, and accordingly all future commitments under the Bolo Agreement are now the responsibility of CPAU.

Allegiant Gold Ltd.

Management's Discussion and Analysis

Year Ended September 30, 2022

(Expressed Canadian Dollars)

On July 18, 2022, CPAU announced phase 1 of the 2022 Bolo Gold-Silver Project exploration program which will comprise surface prospecting and grid rock chip geochemical sampling, targeting the northern extensions of the known gold bearing Mine Fault and East Fault structures; including potential new drill targets within the prospective Windfall Formation unit (Figure 1, and CPAU news release dated June 6, 2022). In total approximately 600 samples will be collected, designed to infill, and extend historical rock chip coverage 1 km north-south and 300 m east-west along two parallel proven gold mineralized fault structures.

On December 29, 2022, the Company received notification from CPAU that it has fulfilled its obligations under initial option and its intention to earn an additional 24.99% interest. The Company is currently reviewing the information supplied by CPAU.

Four Metals

On April 19, 2018, the Company and MinQuest Ltd. entered into an option agreement with Arizona Standard (US) Corp. (the "Four Metals Optionee") and Barksdale Capital Corp. ("Barksdale") granting the Four Metals Optionee an option to acquire a 100% interest in the Four Metals project located in Santa Cruz County, Arizona. The Four Metals Optionee is a wholly owned subsidiary of Barksdale. The common shares of Barksdale are listed for trading on the TSXV. The Company and MinQuest Ltd. each own a 50% interest in 16 unpatented lode mining claims that, in addition to 24 unpatented lode mining claims that are 100% owned by the Company, comprise the Four Metals project. The option agreement requires the Four Metals Optionee to pay \$294,750 (US\$225,000) in staged payments over a five-year period. In addition, Barksdale will issue common shares with a total value of \$294,750 (US\$225,000) in staged issuances over the same five-year period. The cash payments and share issuances are shared equally with MinQuest Ltd. so that the Company will receive 50% of the cash and share payments.

In April 2022, the Company received cash of \$15,638 (2021 – \$15,125) and 33,688 (2021 – 30,944) common shares of Barksdale, with a fair value of \$15,833 (2021 - \$15,572).

Mogollon

The Company holds a 100% interest in Mogollon, subject to underlying royalties.

On August 21, 2020, the Company entered into an agreement with Summa Silver Corp. ("Summa") wherein Summa can acquire a 75% interest in the Mogollon silver property in exchange for an initial cash payment of US\$50,000 and the issuance of 200,000 common shares of Summa, subsequent cash and share payments valued at US\$2,750,000 and by incurring exploration expenditures totalling US\$3,000,000 over a period of three years. Summa can further acquire the remaining 25% interest in Mogollon by paying the Company an additional US\$3,000,000 in either cash or common shares of Summa.

On August 26, 2020, the Company received a cash payment of \$65,826 (US\$50,000) and 200,000 common shares of Summa, with a fair value of \$424,000. On August 17, 2021, the Company received a cash payment of \$126,000 (US\$100,000) and 352,351 common shares of Summa, with a fair value of \$352,351.

On October 11, 2021, the Company received 150,000 common shares of Summa valued at \$126,030 in connection with the approval of a royalty buy-down with one of the underlying claim owners.

On August 19, 2022, the Company received a cash payment of \$130,560 (US\$100,000) and 1,010,169 common shares of Summa, with a fair value of \$653,249.

Goldfield West

The Company holds a 100% interest in 105 minerals claims, subject to a 2% royalty.

On March 15, 2022, the Company entered into a mineral lease agreement (the "Anchor Lease") whereby the Company holds a ten year renewable lease on 80 contiguous mineral claims in exchange for a cash payment of \$76,849 (US\$60,000), 277,668 common shares valued at \$105,514, future annual cash advance royalty payments commencing on the fifth anniversary of the Anchor Lease, and incurring an aggregate of US\$1,500,000 in exploration expenditures on the underlying claims of the Anchor Lease before the fifth anniversary of the Anchor Lease. A 2 % royalty is retained by the lessor.

In May 2022, the Company completed a UAV-based (unmanned aerial vehicle) MAG geophysical survey at Goldfield West ahead of a future drill program. This was followed up by a CSAMT survey completed in August 2022.

(Expressed Canadian Dollars)

Other Projects

The Company's remaining projects, which are inclusive of Overland Pass and Brown's Canyon are both considered to be highly prospective and the Company is focused on optioning them to quality partners for future development.

Allegiant Qualified Person – U.S. properties disclosure only

Andy B. Wallace is a Certified Professional Geologist (CPG) with the American Institute of Professional Geologists and is the Qualified Person under National Instrument 43-101 and has reviewed and approved the technical content relating to the properties located in the USA discussed herein. Mr. Wallace is a director of the Company and a principal of Cordex.

Summary of Quarterly Information

	Sep 30, 2022	Jun 30, 2022	Mar 31, 2022	Dec 31, 2021	Sep 30, 2021	Jun 30, 2021	Mar 31, 2021	Dec 31, 2020
	(\$)	(\$)	(\$)	(\$)	(\$)	(\$)	(\$)	(\$)
Net income (loss) for the period	493,492	(787,896)	(488,647)	(553,262)	(1,733,347)	(314,573)	(682,864)	(120,115)
Basic and diluted income (loss) per share	0.00	(0.01)	(0.01)	(0.01)	(0.02)	(0.00)	(0.01)	(0.00)

	Sep 30, 2022	Jun 30, 2022	Mar 31, 2022	Dec 31, 2021	Sep 30, 2021	Jun 30, 2021	Mar 31, 2021	Dec 31, 2020
	(\$)	(\$)	(\$)	(\$)	(\$)	(\$)	(\$)	(\$)
Cash	4,076,330	6,286,577	7,218,898	3,766,214	4,256,565	389,774	999,922	1,916,954
Total assets	33,928,521	33,104,218	32,953,031	29,508,571	29,701,387	26,280,613	27,017,256	28,007,588
Total non-current financial liabilities	265,741	257,278	258,793	270,903	336,203	335,333	346,907	356,012

Notes on Material Quarterly Variations:

March 31, 2021 – Reported an increase in net loss due to a loss on short-term investments. Furthermore, cash decreased due to the funding of a drill program as well as permitting application at Eastside.

September 30, 2021 – Cash and total assets increased substantially due to the completion of a short-form prospectus offering. Net loss for the period also increased due to the impairment recorded against certain non-core exploration and evaluation assets.

March 31, 2022 – Cash increased substantially due to the completion of a non-brokered private placement with Kinross Gold Corp. ("Kinross").

September 30, 2022 – Cash decreased substantially due to the completion of a diamond drill program at the Eastside property. In addition, the Company reported net income for the period due to property option payments received from Summa in connection with the Mogollon property.

Review of Financial Results – YTD

The Company didn't generate any revenue during the year ended September 30, 2022 ("Current Year") or the year ended September 30, 2021 ("Prior Year").

During the Current Year, the Company reported a net loss of \$1,731,825 versus \$2,850,899 for the Prior Year. The primary reason for the difference was substantial impairment recorded against exploration and evaluation assets in the prior year.

Allegiant Gold Ltd.

Management's Discussion and Analysis

Year Ended September 30, 2022

(Expressed Canadian Dollars)

Selected Annual Information

The Company's functional and presentation currency is the Canadian Dollar for all years presented.

	2022	2021	2020
	(\$)	(\$)	(\$)
Revenue	-	-	-
Net income (loss)	(1,731,825)	(2,850,899)	127,933
Earnings (loss) per share – basic and diluted	(0.02)	(0.04)	0.00
Total assets	33,843,681	29,701,387	29,575,866
Total non-current liabilities	179,908	336,203	1,901,354
Cash dividends	-	-	-

There was a substantial increase in the net loss reported by the Company in 2021 versus 2020. The fundamental reason for change was exploration and evaluation asset impairment and unrealized losses on short-term investments.

Liquidity and Capital Resources

The Company does not currently own or have an interest in any producing resource properties and does not derive any revenues from operations. The Company's activities have been funded primarily through private placements of the Company's common shares. The Company has been successful in its fundraising efforts in the past, but there can be no assurance that the Company will continue to be successful in the future. If such funds are not available or other sources of finance cannot be obtained, then the Company will be required to curtail its activities to a level for which funding is available and can be obtained. The Company's ability to access funding is also contingent on the ongoing demand for commodities and also a function of the demand for gold, both of which are subject to macroeconomic conditions and market fluctuations.

	Year Ended	
	September 30, 2022	September 30, 2021
	(\$)	(\$)
Cash used in operating activities	(974,564)	(1,341,026)
Cash provided by (used in) investing activities	(3,132,913)	(1,864,133)
Cash provided by financing activities	3,906,292	4,590,903
Cash, end of the period	4,076,330	4,526,565

As at September 30, 2022, the Company had working capital of \$4,189,322 compared to \$4,602,843 at September 30, 2021. Working capital increased due to option payments received on the Mogollon property as well as a non-brokered private placement with Kinross.

As at September 30, 2022, the Company had current liabilities of \$947,013 and non-current liabilities of \$179,908. In March 2022, the Company completed a non-brokered financing wherein it raised \$4,014,414 from an investment by Kinross. Accordingly, management is confident that it can meet its working capital requirements and obligations as they come due in the next twelve months.

Allegiant Gold Ltd.

Management's Discussion and Analysis

Year Ended September 30, 2022

(Expressed Canadian Dollars)

Subsequent Events

Subsequent to September 30, 2022, the Company:

- a) granted 1,075,000 stock options exercisable at \$0.25 for a period of five years.
- b) granted 1,350,000 RSUs that expire on December 31, 2025.
- c) issued 150,000 common shares pursuant to the exercise of RSUs.
- d) received notification from CPAU that it has fulfilled its 50.1% earn-in obligations under the initial option agreement on the Bolo property and its intention to earn an additional 24.99% interest. The Company is currently reviewing the information supplied by CPAU.

Commitments and Related Party Transactions

The following is a summary of related party transactions for the years ended September 30, 2022 and 2021:

	September 30, 2022	September 30, 2021
	(\$)	(\$)
Office rent and administration services paid or accrued to Orea, a company that shares directors in common	18,000	18,000
Management fees paid to a corporation controlled by the former Chairman of the Company	-	24,000
Management fees and medical reimbursement paid to the CEO of the Company	232,832	230,117
Professional fees paid to a corporation controlled by the CFO of the Company	125,400	120,000
Directors fees paid or accrued	118,000	127,839
Consulting fees paid to a director of the Company	10,000	-
Share-based compensation in the form of vested stock options and RSUs issued to directors and officers of the Company	724,281	157,284
Exploration and evaluation expenditures paid to a director of the Company	115,316	101,613
	<u>1,343,829</u>	<u>778,853</u>

The following summarizes advances and amounts payable to related parties:

	September 30, 2022	September 30, 2021
	(\$)	(\$)
Receivable from officer of the Company	25,000	-
Advances to officers of the Company	62,502	-
Amounts due to directors, included in accounts payable	(34,262)	(23,190)
	<u>53,240</u>	<u>(23,190)</u>

The Company entered into a lease agreement on May 1, 2020, for the rental of storage space in Reno, Nevada with a term that expired on April 30, 2022. The lease was renewed for a further term of 2 year term that expires on April 30, 2024. The remaining rent payable under the lease is \$64,041 (US\$49,739).

Allegiant Gold Ltd.

Management's Discussion and Analysis

Year Ended September 30, 2022

(Expressed Canadian Dollars)

Critical Accounting Estimates

Significant accounting judgments, estimates and assumptions

The preparation of the Company's financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets, liabilities and contingent liabilities at the date of the financial statements and reported amounts of revenues and expenses during the reporting period. Estimates and assumptions are continuously evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. However, actual outcomes can differ from these estimates.

The following areas required a significant degree of estimation and judgment:

Recoverability of exploration and evaluation assets

he application of the Company's accounting policy for exploration and evaluation expenditures requires judgment to determine whether future economic benefits are likely, from either future exploitation or sale, or whether activities have not reached a stage that permits a reasonable assessment of the existence of reserves.

Share-based payments

The fair value of stock options issued are subject to the limitation of the Black-Scholes option pricing model, which incorporates market data and involves uncertainty in estimates used by management in the assumptions. The Black-Scholes option pricing model requires the input of highly subjective assumptions, including the volatility of share prices, and, as a result, changes in subjective input assumptions can materially affect the fair value estimate.

Decommissioning provisions

Restoration costs will be incurred by the Company in connection with certain exploration activities conducted on exploration and evaluation assets. The Company estimates abandonment and reclamation costs based on a combination of publicly available industry benchmarks and internal site-specific information. The ultimate restoration liability is uncertain and can vary in response to many factors including changes to relevant legal requirements, the emergence of new restoration techniques, experience at other sites, or changes in the risk-free discount rate. The expected timing and amount of expenditure can also change in response to changes in laws and regulations or their interpretation. As a result, there could be significant adjustments to the provisions established which would affect future financial results.

Functional currency

The functional currency is the currency of the primary economic environment in which the entity operates and has been determined for each entity within the Company. The functional currencies are as follows:

Entity	Functional Currency
Allegiant Gold Ltd.	Canadian dollar
Allegiant Gold Holding Ltd. ("AGHL")	Canadian dollar
Allegiant Gold (U.S.) Ltd. ("AGUS")	United States dollar

Off-Balance Sheet Arrangements

The Company has no off-balance sheet arrangements.

Allegiant Gold Ltd.

Management's Discussion and Analysis

Year Ended September 30, 2022

(Expressed Canadian Dollars)

Proposed Transactions

There are no material proposed transactions as at September 30, 2022 and the Report Date of this MD&A.

New Accounting Standards Adopted During the Period

There were no new accounting standards adopted during the year.

Outstanding Share Information

Outstanding Share Data

The Company has authorized capital of an unlimited number of common shares without par value. The table below represents Allegiant's capital structure as at September 30, 2022 and the Report Date of this MD&A:

	Report Date	September 30, 2022
Common shares	102,595,580	102,445,580
Warrants (exercisable at \$0.40 – to \$0.70)	11,507,980	11,507,980
Restricted stock units	3,768,750	2,618,750
Share options (exercisable at \$0.10 to \$0.60)	4,245,000	3,170,000

Financial Instruments

The Company's financial instruments consist of cash, short-term investments, receivables, reclamation bonds, accounts payable, and the CEBA loan.

Classification

On initial recognition, the Company classifies its financial instruments in the following categories: at ("FVTPL"), at fair value through other comprehensive income (loss) ("FVTOCI") or at amortized cost.

A financial asset is measured at amortized cost if it meets both of the following conditions and is not designated as FVTPL:

- it is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A debt investment is measured at FVTOCI if it meets both of the following conditions and is not designated as FVTPL:

- it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Allegiant Gold Ltd.

Management's Discussion and Analysis

Year Ended September 30, 2022

(Expressed Canadian Dollars)

An equity investment that is held for trading is measured at FVTPL. For other equity investments that are not held for trading, the Company may irrevocably elect to designate them as FVTOCI. This election is made on an investment-by-investment basis.

All financial assets not classified or measured at amortized cost or FVTOCI as described above are measured at FVTPL. This includes all derivative financial assets. On initial recognition, the Company may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortized cost or at FVTOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

Financial liabilities are measured at amortized cost, unless they are required to be measured at FVTPL (such as instruments held for trading or derivatives) or the Company has elected to measure them at FVTPL.

Measurement

Financial assets at FVTOCI

Elected investments in equity instruments at FVTOCI are initially recognized at fair value plus transaction costs. Subsequently they are measured at fair value, with gains and losses recognized in other comprehensive income (loss).

Financial assets and liabilities at amortized cost

Financial assets and liabilities at amortized cost are initially recognized at fair value plus or minus transaction costs, respectively, and subsequently carried at amortized cost less any impairment.

Financial assets and liabilities at FVTPL

Financial assets and liabilities carried at FVTPL are initially recorded at fair value and transaction costs are expensed in profit or loss. Realized and unrealized gains and losses arising from changes in the fair value of the financial assets and liabilities held at FVTPL are recognized in profit or loss in the period in which they arise. Where management has opted to recognize a financial liability at FVTPL, any changes associated with the Company's own credit risk will be recognized in other comprehensive income (loss).

Impairment of financial assets at amortized cost

The Company recognizes a loss allowance for expected credit losses on financial assets that are measured at amortized cost. At each reporting date, the Company measures the loss allowance for the financial asset at an amount equal to the lifetime expected credit losses if the credit risk on the financial asset has increased significantly since initial recognition. If at the reporting date, the financial asset has not increased significantly since initial recognition, the Company measures the loss allowance for the financial asset at an amount equal to the twelve month expected credit losses. The Company shall recognize in profit or loss, as an impairment gain or loss, the amount of expected credit losses (or reversal) that is required to adjust the loss allowance at the reporting date to the amount that is required to be recognized.

Derecognition

Financial assets

The Company derecognizes financial assets only when the contractual rights to cash flows from the financial assets expire, or when it transfers the financial assets and substantially all of the associated risks and rewards of ownership to another entity. Gains and losses on derecognition are generally recognized in profit or loss. However, gains and losses on derecognition of financial assets classified as FVTOCI remain within accumulated other comprehensive income (loss).

Financial liabilities

The Company derecognizes financial liabilities only when its obligations under the financial liabilities are discharged, cancelled or expired. Generally, the difference between the carrying amount of the financial liability derecognized and the consideration paid and payable, including any non-cash assets transferred or liabilities assumed, is recognized in profit or loss.

Allegiant Gold Ltd.

Management's Discussion and Analysis

Year Ended September 30, 2022

(Expressed Canadian Dollars)

Risks and Uncertainties

Prior to making an investment decision, investors should consider the investment risks set out below and those described elsewhere in this document, which are in addition to the usual risks associated with an investment in a business at an early stage of development. The directors of the Company consider the risks set out below to be the most significant to potential investors in the Company, but do not represent all of the risks associated with an investment in securities of the Company. If any of these risks materialize into actual events or circumstances or other possible additional risks and uncertainties of which the Directors are currently unaware or which they consider not to be material in relation to the Company's business, actually occur, the Company's assets, liabilities, financial condition, results of operations (including future results of operations), business and business prospects are likely to be materially and adversely affected.

Exploration, development and production risks

An investment in the Company's shares is speculative due to the nature of the Company's involvement in the evaluation, acquisition, exploration and, if warranted, development and production of minerals. Mineral exploration involves a high degree of risk and there is no assurance that expenditures made on future exploration by the Company will result in new discoveries in commercial quantities.

While the Company has a limited number of specific identified exploration or development prospects, management will continue to evaluate prospects on an ongoing basis in a manner consistent with industry standards. The long-term commercial success of the Company depends on its ability to find, acquire, develop and commercially produce reserves. No assurance can be given that the Company will be able to locate satisfactory properties for acquisition or participation. Moreover, if such acquisitions or participations are identified, the Company may determine that current markets, terms of acquisition and participation or pricing conditions make such acquisitions or participations uneconomic. The Company has no earnings record, no reserves and no producing resource properties.

The Company's resource projects are in the exploration stage. Resource exploration, development, and operations are highly speculative, characterized by a number of significant risks, which even a combination of careful evaluation, experience and knowledge will not eliminate. Few properties that are explored are ultimately developed into producing mines. Unusual or unexpected formations, formation pressures, fires, power outages, labour disruptions, flooding, explosions, cave-ins, landslides and the inability to obtain suitable or adequate machinery, equipment or labour are other risks involved in the operation of mines and the conduct of exploration programs. The Company must rely upon consultants and contractors for exploration, development, construction and operating expertise. Substantial expenditures are required to establish mineral resources and mineral reserves through drilling, to develop metallurgical processes to extract the metal from mineral resources and, in the case of new properties, to develop the mining and processing facilities and infrastructure at any site chosen for mining.

There is no assurance that surface rights agreements that may be necessary for future operations will be obtained when needed, on reasonable terms, or at all, which could adversely affect the business of the Company.

No assurance can be given that minerals will be discovered in sufficient quantities at any of the Company's mineral projects to justify commercial operations or that funds required for additional exploration or development will be obtained on a timely basis. Whether a mineral deposit will be commercially viable depends on a number of factors, some of which are: the particular attributes of the deposit, such as size, grade and proximity to infrastructure; metal prices which are highly cyclical; the proximity and capacity of milling facilities; and government regulations, including regulations relating to prices, taxes, royalties, land tenure, land use, importing and exporting of minerals and environmental protection. The exact effect of these factors cannot accurately be predicted, but the combination of these factors may result in the Company not receiving an adequate return on invested capital.

Additional Funding Requirements

From time to time, the Company will require additional financing in order to carry out its acquisition, exploration and development activities. Failure to obtain such financing on a timely basis could cause the Company to forfeit its interest in certain properties, miss certain acquisition opportunities, delay or indefinitely postpone further exploration and development of its projects with the possible loss of such properties, and reduce or terminate its operations. If the Company's cash flow from operations is not sufficient to satisfy its capital expenditure requirements, there can be no assurance that additional debt or equity financing will be available to meet these requirements or be available on favorable terms.

Allegiant Gold Ltd.

Management's Discussion and Analysis

Year Ended September 30, 2022

(Expressed Canadian Dollars)

Prices, Markets and Marketing of Natural Resources

Gold is a commodity whose price is determined based on world demand, supply and other factors, all of which are beyond the control of the Company. World prices for gold have fluctuated widely in recent years. The marketability and price of natural resources which may be acquired or discovered by the Company will be affected by numerous factors beyond its control. The Company has limited direct experience in the marketing of gold.

Government regulations, including regulations relating to prices, taxes, royalties, land tenure, land use, importing and exporting of natural resources and environmental protection are all factors which may affect the marketability and price of natural resources. The exact effect of these factors cannot be accurately predicted, but any one or a combination of these factors could result in the Company not receiving an adequate return on investment for shareholders.

Dilution

In order to finance future operations and development efforts, the Company may raise funds through the issue of shares or securities convertible into shares. The constating documents of the Company allow it to issue, among other things, an unlimited number of shares for such consideration and on such terms and conditions as may be established by the directors of the Company, in many cases, without the approval of shareholders. The Company cannot predict the size of future issues of shares or securities convertible into shares or the effect, if any, that future issues and sales of shares will have on the price of the shares. Any transaction involving the issue of previously authorized but unissued shares or securities convertible into shares would result in dilution, possibly substantial, to present and prospective shareholders of the Company.

Environmental Risks

All phases of the natural resources business present environmental risks and hazards and are subject to environmental regulation pursuant to a variety of international conventions, and national, state and municipal laws and regulations. Environmental legislation provides for, among other things, restrictions and prohibitions on spills, releases or emissions of various substances produced in association with operations. The legislation also requires that facility sites and mines be operated, maintained, abandoned and reclaimed to the satisfaction of applicable regulatory authorities. Compliance with such legislation can require significant expenditures and a breach may result in the imposition of fines and penalties, some of which may be material. Environmental legislation is evolving in a manner expected to result in stricter standards and enforcement, larger fines and liability and potentially increased capital expenditures and operating costs. The discharge of tailings or other pollutants into the air, soil or water may give rise to liabilities to foreign governments and third parties and may require the Company to incur costs to remedy such discharge. No assurance can be given that environmental laws will not result in a curtailment of production or a material increase in the costs of production, development or exploration activities or otherwise adversely affect the Company's financial condition, results of operations or prospects.

Companies engaged in the exploration and development of mineral properties generally experience increased costs, and delays as a result of the need to comply with applicable laws, regulations and permits. The Company believes it is in substantial compliance with all material laws and regulations which currently apply to its activities.

Failure to comply with applicable laws, regulations and permitting requirements may result in enforcement actions thereunder, including orders issued by regulatory or judicial authorities causing operations to cease or be curtailed and may include corrective measures requiring capital expenditures, installation of additional equipment, or remedial actions. Parties engaged in natural resource exploration and development activities may be required to compensate those suffering loss or damage by reason of its activities and may have civil or criminal fines or penalties imposed for violations of applicable laws or regulations and, in particular, environmental laws.

Amendments to current laws, regulations and permits governing operations and activities of natural resources companies, or more stringent implementation thereof, could have a material adverse impact on the Company and cause increases in capital expenditures or production costs or reduction in levels of production at producing properties or require abandonment or delays in developments of new properties.

Allegiant Gold Ltd.

Management's Discussion and Analysis

Year Ended September 30, 2022

(Expressed Canadian Dollars)

Reliance on Operators and Key Employees

The success of the Company will be largely dependent upon the performance of its management and key employees. The Company does not have any key man insurance policies and therefore there is a risk that the death or departure of any member of management or any key employee could have a material adverse effect on the Company. In assessing the risk of an investment in the Company's shares, potential investors should realize that they are relying on the experience, judgment, discretion, integrity and good faith of the management of the Company. An investment in the Company's shares is suitable only for those investors who are willing to risk a loss of their entire investment and who can afford to lose their entire investment.

Regulatory Requirements

Mining operations, development and exploration activities are subject to extensive laws and regulations governing prospecting, development, production, exports, taxes, labour standards, occupational health, waste disposal, environmental protection and remediation, protection of endangered and protected species, mine safety, toxic substances and other matters. Changes in these regulations or in their application are beyond the control of the Company and could adversely affect its operations, business and results of operations.

Government approvals and permits are currently, and may in the future be, required in connection with the mineral projects in which the Company has an interest. To the extent such approvals are required and not obtained, the Company may be restricted or prohibited from proceeding with planned exploration or development activities. Failure to comply with applicable laws, regulations and permitting requirements may result in enforcement actions thereunder, including orders issued by regulatory or judicial authorities causing operations to cease or be curtailed, and may include corrective measures requiring capital expenditures, installation of additional equipment, or remedial actions. Parties engaged in mining operations may be required to compensate those suffering loss or damage by reason of the mining activities and may be liable for civil or criminal fines or penalties imposed for violations of applicable laws or regulations. Amendments to current laws, regulations and permitting requirements, or more stringent application of existing laws, could have a material adverse impact on the Company and cause increases in capital expenditures or production costs or reductions in levels of production at producing properties or require abandonment or delays in development of properties.

Title Matters

Although title to the properties has been reviewed by the Company, formal title opinions have not been obtained by the Company for most of its mineral properties and, consequently, no assurances can be given that there are no title defects affecting such properties and that such title will not be challenged or impaired. The acquisition of title to resource properties is a very detailed and time-consuming process. Title to, and the area of, resource claims may be disputed. There may be valid challenges to the title of any of the mineral properties in which the Company holds an interest that, if successful, could impair development and/or operations thereof. A defect could result in the Company losing all or a portion of its right, title, estate and interest in and to the properties to which the title defect relates.

Any of the mineral properties in which the Company holds an interest may be subject to prior unregistered liens, agreements or transfers or other undetected title defects. There is no guarantee that title to the properties will not be challenged or impugned. The Company is satisfied, however, that evidence of title to each of the properties is adequate and acceptable by prevailing industry standards.

Enforcement of Civil Liabilities

Certain of the Company's directors and certain of the experts named herein reside outside of Canada and, similarly, a majority of the assets of the Company are located outside of Canada. It may not be possible for investors to effect service of process within Canada upon the directors and experts not residing in Canada. It may also not be possible to enforce against the Company and certain of its directors and experts named herein judgements obtained in Canadian courts predicated upon the civil liability provisions of applicable securities laws in Canada.

Permits and Licenses

The operations of the Company will require licenses and permits from various governmental authorities. There can be no assurance that the Company will be able to obtain all necessary licenses and permits that may be required to carry out exploration and development of its projects.

Allegiant Gold Ltd.

Management's Discussion and Analysis

Year Ended September 30, 2022

(Expressed Canadian Dollars)

Availability of Equipment and Access Restrictions

Natural resource exploration and development activities are dependent on the availability of drilling and related equipment in the particular areas where such activities will be conducted. Demand for such limited equipment or access restrictions may affect the availability of such equipment to the Company and may delay exploration and development activities.

Conflict of Interest of Management

Certain of the Company's directors and officers are also directors and officers of other natural resource companies. Consequently, there exists the possibility for such directors and officers to be in a position of conflict. Any decision made by any of such directors and officers relating to the Company will be made in accordance with their duties and obligations to deal fairly and in good faith with the Company and such other companies.

Competition

The Company actively competes for acquisitions, leases, licenses, concessions, claims, skilled industry personnel and other related interests with a substantial number of other companies, many of which have significantly greater financial resources than the Company.

The Company's ability to successfully bid on and acquire additional property rights to participate in opportunities and to identify and enter into commercial arrangements with other parties will be dependent upon developing and maintaining close working relationships with its future industry partners and joint operators and its ability to select and evaluate suitable properties and to consummate transactions in a highly competitive environment.

Insurance

The Company's involvement in the exploration for and development of natural resource properties may result in the Company becoming subject to liability for certain risks, and in particular unexpected or unusual geological operating conditions, including rock bursts, cave ins, fires, floods, earthquakes, pollution, blow-outs, property damage, personal injury or other hazards. Although the Company will obtain insurance in accordance with industry standards to address such risks, such insurance has limitations on liability that may not be sufficient to cover the full extent of such liabilities. In addition, such risks may not, in all circumstances be insurable, or, in certain circumstances, the Company may elect not to obtain insurance to deal with specific risks due to the high premiums associated with such insurance or other reasons. The payment of such uninsured liabilities would reduce the funds available to the Company. The occurrence of a significant event that the Company is not fully insured against, or the insolvency of the insurer or such event, could have a material adverse effect on the Company's financial position, results of operations or prospects.

No assurance can be given that insurance to cover the risks to which the Company's activities will be subject will be available at all or at economically feasible premiums. Insurance against environmental risks (including potential for pollution or other hazards as a result of the disposal of waste products occurring from production) is not generally available to the Company or to other companies within the industry. The payment of such liabilities would reduce the funds available to the Company. Should the Company be unable to fund fully the cost of remedying an environmental problem, the Company might be required to suspend operations or enter into interim compliance measures pending completion of the required remedy.

The Market Price of Shares May Be Subject to Wide Price Fluctuations

The market price of shares may be subject to wide fluctuations in response to many factors, including variations in the operating results of the Company, divergence in financial results from analysts' expectations, changes in earnings estimates by stock market analysts, changes in the business prospects for the Company, general economic conditions, changes in mineral reserve or resource estimates, results of exploration, changes in results of mining operations, legislative changes, and other events and factors outside of the Company's control.

In addition, stock markets have from time to time experienced extreme price and volume fluctuations, which, as well as general economic and political conditions, could adversely affect the market price for the shares.

The Company is unable to predict whether substantial amounts of shares will be sold in the open market. Any sales of substantial amounts of shares in the public market, or the perception that such sales might occur, could materially and adversely affect the market price of the shares.

Allegiant Gold Ltd.

Management's Discussion and Analysis

Year Ended September 30, 2022

(Expressed Canadian Dollars)

Global Financial Conditions

Global financial conditions over the last few years have been characterized by increased volatility and several financial institutions have either gone into bankruptcy or have had to be rescued by governmental authorities. These factors may affect the ability of the Company to obtain equity or debt financing in the future on terms favourable to it. Additionally, these factors, as well as other related factors, may cause decreases in asset values that are deemed to be other than temporary, which may result in impairment losses. If such increased levels of volatility and market turmoil continue, the operations of the Company may suffer adverse impact and the price of our shares may be adversely affected.

Credit risk

Credit risk is the risk of an unexpected loss if a party to its financial instruments fails to meet its contractual obligations. The Company's financial assets exposed to credit risk will be primarily composed of cash and amounts receivable. While the Company will attempt to mitigate its exposure to credit risk, there can be no assurance that unexpected losses will not occur. Such unexpected losses could adversely affect the Company.

Management's Responsibility for Financial Statements

The information provided in this report, including the financial statements, is the responsibility of management. In the preparation of these statements, estimates are sometimes necessary to make a determination of future values for certain assets or liabilities. Management believes such estimates have been based on careful judgments and have been properly reflected in the accompanying consolidated financial statements.

COVID 19

In March 2020 the World Health Organization declared coronavirus COVID-19 a global pandemic. This contagious disease outbreak, which has continued to spread, and any related adverse public health developments, has adversely affected workforces, economies, and financial markets globally, potentially leading to an economic downturn. It is not possible for the Company to predict the duration or magnitude of the adverse results of the outbreak and its effects on the Company's business or ability to raise funds.

Disclosure and Internal Controls

Disclosure controls and procedures have been established to provide reasonable assurance that material information relating to the Company is made known to management, particularly during the period in which annual filings are being prepared. Furthermore, internal controls over financial reporting have been established to ensure the Company's assets are safeguarded and to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements in accordance with IFRS.

Caution Regarding Forward Looking Statements

This document contains certain forward-looking information and forward-looking statements, as defined in applicable securities laws (collectively referred to as "forward-looking statements"). Often, but not always, forward-looking statements can be identified by the use of words such as "plans," "expects" or "does not expect," "is expected," "planned," "budget," "scheduled," "estimates," "continues," "forecasts," "projects," "predicts," "intends," "anticipates" or "does not anticipate," or "believes," or variations of such words and phrases, or statements that certain actions, events or results "may," "could," "would," "should," "might" or "will" be taken, occur or be achieved. Forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause our actual results, performance or achievements to be materially different from any of our future results, performance or achievements expressed or implied by the forward-looking statements; consequently, undue reliance should not be placed on forward-looking statements.

Allegiant Gold Ltd.

Management's Discussion and Analysis

Year Ended September 30, 2022

(Expressed Canadian Dollars)

These risks, uncertainties and other factors include, but are not limited to: changes in Canadian/US dollar exchange rates; management's strategies, objectives and expectations; the Company's tax position and the tax and royalty rates applicable; the Company's ability to acquire necessary permits and other authorizations in connection with its projects; risks associated with environmental compliance, including without limitation changes in legislation and regulation, and estimates of reclamation and other costs; the Company's cost reduction and other financial and operating objectives; the Company's environmental, health and safety initiatives; the availability of qualified employees and labour for operations; risks that may affect operating or capital plans; risks created through competition for mining properties; risks associated with exploration projects, and mineral reserve and resource estimates, including the risk of errors in assumptions and methodologies; risks associated with dependence on third parties for the provision of critical services; risks associated with non-performance by contractual counterparties; risks associated with title; and general business and economic conditions.

Forward-looking statements are based on a number of assumptions that may prove to be incorrect, including, but not limited to, assumptions about: general business and economic conditions; the expected timing to complete a feasibility study and other exploration milestones, the timing of the receipt of required permits and approvals for operations; the availability of equity and other financing on reasonable terms; power prices; the Company's ability to procure equipment and operating supplies in sufficient quantities and on a timely basis; the Company's ability to attract and retain skilled labour and staff; the impact of changes in Canadian/US dollar and other foreign exchange rates on costs and results; market competition; and ongoing relations with employees and with business partners and joint venturers.

We caution you that the foregoing list of important factors and assumptions is not exhaustive. Events or circumstances could cause our actual results to differ materially from those estimated or projected and expressed in, or implied by, these forward-looking statements. Management undertakes no obligation to update publicly or otherwise revise any forward-looking statements or the foregoing list of factors, whether as a result of new information or future events or otherwise, except as may be required under applicable laws.

Consolidated Financial Statements

**For the Years Ended
September 30, 2022 and 2021**

(Expressed in Canadian Dollars)

INDEPENDENT AUDITOR'S REPORT

To the Shareholders of
Allegiant Gold Ltd.

We have audited the accompanying consolidated financial statements of Allegiant Gold Ltd. (the "Company"), which comprise the consolidated statements of financial position as at September 30, 2022 and 2021, and the consolidated statements of loss and comprehensive loss, cash flows, and changes in shareholders' equity for the years then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, these consolidated financial statements present fairly, in all material respects, the financial position of the Company as at September 30, 2022 and 2021, and its financial performance and its cash flows for the years then ended in accordance with International Financial Reporting Standards ("IFRS").

Basis for Opinion

We conducted our audits in accordance with Canadian generally accepted auditing standards. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the consolidated financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our opinion.

Other Information

Management is responsible for the other information. The other information obtained at the date of this auditor's report includes Management's Discussion and Analysis.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

We obtained Management's Discussion and Analysis prior to the date of this auditor's report. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRS, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with Canadian generally accepted auditing standards, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Company to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

The engagement partner on the audit resulting in this independent auditor's report is Guy Thomas.

The accompanying notes are an integral part of these consolidated financial statements

Allegiant Gold Ltd.

Notes to the Consolidated Financial Statements
For the Years Ended September 30, 2022 and 2021
(Expressed in Canadian Dollars)

1. NATURE OF OPERATIONS AND GOING CONCERN

Allegiant Gold Ltd. (the “Company” or “Allegiant”), was incorporated on September 26, 2017 under the laws of the Province of British Columbia, Canada. The Company trades on the TSX Venture Exchange (“TSXV”) under the symbol “AUAU” and on the OTCQX under the symbol “AUXXF”. The Company’s head office and principal address is located at 1090 Hamilton Street, Vancouver, British Columbia, V6B 2R9, Canada.

The Company’s principal business activities are the exploration and evaluation of resource properties located in the United States of America. The Company is in the process of exploring its resource properties, but it has not yet determined whether these properties contain ore reserves that are economically recoverable. The recoverability of the amounts shown for exploration and evaluation assets are dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain necessary financing to complete the development of those reserves and upon future profitable production or from proceeds of disposition. The Company’s exploration and evaluation activities are not dependent on seasonality and may operate year-round; however, the Company may adjust the level of exploration and evaluation activities to manage its capital structure in light of changes in global economic conditions. To date, the Company has not received any revenue from mining operations and is considered to be in the exploration stage.

The Company’s continuation as a going concern is dependent upon its ability to raise equity capital or borrowings sufficient to meet current and future obligations. If for any reason, the Company is unable to continue as a going concern, then this could result in adjustments to the amounts and classifications of assets and liabilities in the Company’s financial statements and such adjustments could be material. The Company estimates that it has sufficient cash to continue operations for the upcoming twelve months.

In March 2020, the World Health Organization declared coronavirus COVID-19 a global pandemic. This contagious disease outbreak, which has continued to spread, and any related adverse public health developments, has adversely affected workforces, economies, and financial markets globally, potentially leading to an economic downturn. It is not possible for the Company to predict the duration or magnitude of the adverse results of the outbreak and its effects on the Company’s business or ability to raise funds.

2. BASIS OF PRESENTATION

(a) Statement of compliance

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”), and Interpretations of the International Financial Reporting Interpretations Committee (“IFRIC”).

These consolidated financial statements were approved by the Board of Directors and authorized for issue on January 30, 2023.

(b) Basis of consolidation

These consolidated financial statements include the accounts of Allegiant and its wholly-owned subsidiaries as follows:

Entity	Ownership Interest	Place of Incorporation
Allegiant Gold Holding Ltd.	100%	British Columbia, Canada
Allegiant Gold (U.S.) Ltd.	100%	Arizona, USA

All inter-company transactions and balances have been eliminated upon consolidation.

Control exists where the parent entity has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. Subsidiaries are included in the consolidated financial statements from the date control commences until the date control ceases.

Allegiant Gold Ltd.

Notes to the Consolidated Financial Statements
For the Years Ended September 30, 2022 and 2021
(Expressed in Canadian Dollars)

2. BASIS OF PRESENTATION (continued)

(c) Significant accounting judgments, estimates and assumptions

The preparation of the Company's consolidated financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets, liabilities and contingent liabilities at the date of the financial statements and reported amounts of revenues and expenses during the reporting period. Estimates and assumptions are continuously evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. However, actual outcomes can differ from these estimates.

The following areas required a significant degree of estimation and judgment:

Recoverability of exploration and evaluation assets

The application of the Company's accounting policy for exploration and evaluation expenditures requires judgment to determine whether future economic benefits are likely, from either future exploitation or sale, or whether activities have not reached a stage that permits a reasonable assessment of the existence of reserves.

Share-based payments

The fair value of stock options issued are subject to the limitation of the Black-Scholes option pricing model, which incorporates market data and involves uncertainty in estimates used by management in the assumptions. The Black-Scholes option pricing model requires the input of highly subjective assumptions, including the volatility of share prices, and, as a result, changes in subjective input assumptions can materially affect the fair value estimate.

Decommissioning provisions

Restoration costs will be incurred by the Company in connection with certain exploration activities conducted on exploration and evaluation assets. The Company estimates abandonment and reclamation costs based on a combination of publicly available industry benchmarks and internal site-specific information. The ultimate restoration liability is uncertain and can vary in response to many factors including changes to relevant legal requirements, the emergence of new restoration techniques, experience at other sites, or changes in the risk-free discount rate. The expected timing and amount of expenditure can also change in response to changes in laws and regulations or their interpretation. As a result, there could be significant adjustments to the provisions established which would affect future financial results.

Functional currency

The functional currency is the currency of the primary economic environment in which the entity operates and has been determined for each entity within the Company. The functional currencies are as follows:

Entity	Functional Currency
Allegiant Gold Ltd.	Canadian dollar
Allegiant Gold Holding Ltd. ("AGHL")	Canadian dollar
Allegiant Gold (U.S.) Ltd. ("AGUS")	Canadian dollar

The Company determined that the functional currency of AGUS changed from the US dollar to the Canadian dollar effective July 1, 2022. Considerations for the change included a significant increase in expenditures over receipts and reliance on the parent company for financing.

Allegiant Gold Ltd.

Notes to the Consolidated Financial Statements
For the Years Ended September 30, 2022 and 2021
(Expressed in Canadian Dollars)

3. SIGNIFICANT ACCOUNTING POLICIES

(a) Foreign currency translation

At the end of each reporting period, assets and liabilities of the entities whose functional currency is not the Canadian dollar are translated at the rate of exchange at the statement of financial position date. Revenues and expenses are translated at the exchange rates approximating those in effect on the date of the transactions. Exchange gains and losses arising on translation are reflected in other comprehensive income or loss for the year.

Transactions in currencies other than the Canadian dollar are recorded at exchange rates prevailing on the dates of the transactions. At the end of each reporting period, assets and liabilities of the Company that are denominated in foreign currencies are translated at the rate of exchange at the statement of financial position date. Revenues and expenses are translated at the exchange rates approximating those in effect on the date of the transactions. Exchange gains and losses arising on translation are reflected in profit or loss for the year.

(b) Exploration and evaluation assets

Upon acquiring the legal right to explore a property, costs related to the acquisition, exploration and evaluation are capitalized by property. If commercially profitable ore reserves are developed, capitalized costs of the related exploration and evaluation assets are reclassified as mining assets and amortized using the unit of production method. If, after management review, it is determined that capitalized acquisition, exploration and evaluation costs are not recoverable over the estimated economic life of the exploration and evaluation assets, or the exploration and evaluation assets are abandoned, or management deems there to be an impairment in value, the exploration and evaluation assets is written down to its net realizable value.

Any option payments received by the Company from third parties or tax credits refunded to the Company are credited to the capitalized cost of the exploration and evaluation assets. If payments received exceed the capitalized cost of the exploration and evaluation assets, the excess is recognized as income in the year received. The amounts shown for exploration and evaluation assets do not necessarily represent present or future values. The recoverability of the exploration and evaluation asset is dependent upon the discovery of economically recoverable reserves, the ability of the Company to obtain the necessary financing to complete the development, and future profitable production or proceeds from the disposition thereof.

Investigation costs consist of expenditures incurred in the process of evaluating potential property acquisitions. Such expenditures will continue to be expensed until the property is acquired.

The proceeds from royalties granted are deducted from the costs of the related property and any excess is recorded as income.

(c) Impairment of long-lived assets

At each reporting date, the Company reviews the carrying amounts of its long-lived assets to determine whether there are any indications of impairment. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment, if any.

The recoverable amount of an asset is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. For the purpose of impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of cash inflows of other assets or groups of assets (the "cash-generating unit" or "CGU"). This generally results in the Company evaluating its non-financial assets on an exploration asset by exploration asset basis.

If the carrying amount of an asset or CGU exceeds its recoverable amount, the carrying amount of the asset or CGU is reduced to its recoverable amount. An impairment loss is recognized in profit or loss.

Impairment losses recognized in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reduced if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of amortization, if no impairment loss had been recognized.

Allegiant Gold Ltd.

Notes to the Consolidated Financial Statements
For the Years Ended September 30, 2022 and 2021
(Expressed in Canadian Dollars)

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

(d) Restoration provision

The Company recognizes liabilities for statutory, contractual, constructive or legal obligations associated with the retirement of long-term assets, when those obligations result from the acquisition, construction, development or normal operation of the assets. The net present value of future restoration cost estimates arising from the decommissioning of well sites is capitalized to the exploration and evaluation assets along with a corresponding increase in the restoration provision in the period incurred. The Company uses a pre-tax discount rate that reflects the time value of money to calculate the net present value of the decommissioning provisions. The restoration asset will be depreciated on the same basis as the exploration and evaluation assets or the oil and gas properties.

The Company's estimates of restoration costs could change as a result of changes in regulatory requirements, discount rates and assumptions regarding the amount and timing of the future expenditures. These changes are recorded directly to the exploration and evaluation assets with a corresponding entry to the restoration provision, except when the related exploration and evaluation assets is closed or the carrying value has been reduced to a \$nil value. Changes in estimates of restoration costs for closed exploration and evaluation assets are recorded in profit or loss. The Company's estimates are reviewed each reporting date for changes in regulatory requirements, discount rates, effects of inflation and changes in estimates.

The restoration provisions are accreted to full value over time through charges to finance expenses in profit or loss.

(e) Loss per share

Loss per share is calculated using the weighted average number of common shares outstanding during the year. The calculation of diluted loss per share assumes that outstanding options and warrants are exercised and the proceeds are used to repurchase shares of the Company at the average market price of the shares for the period. The effect is to increase the number of shares used to calculate diluted earnings per share and is only recognized when the effect is dilutive.

(f) Income taxes

Income tax is recognized in profit or loss except to the extent that it relates to items recognized directly in equity, in which case it is recognized in equity. Current tax expense is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at period end, adjusted for amendments to tax payable with regards to previous years.

Deferred income tax assets and liabilities are recognized for the tax consequences of temporary differences by applying substantively enacted statutory tax rates applicable to future years to differences between the financial statement carrying amounts and the tax bases of existing assets and liabilities.

The effect on deferred taxes for a change in tax rates is generally recognized in profit or loss in the period that includes the substantive enactment.

A deferred tax asset is recognized to the extent that it is probable that future taxable profits will be available against which the asset can be utilized. To the extent that the Company does not consider it probable that a deferred tax asset will be recovered, the deferred tax asset is reduced.

Deferred income tax assets and liabilities are offset when they relate to income taxes levied by the same taxation authority and the Company intends to settle its current tax assets and liabilities on a net basis. Current and deferred taxes relating to items recognized directly in equity is recognized in equity and not in profit or loss.

Allegiant Gold Ltd.

Notes to the Consolidated Financial Statements
For the Years Ended September 30, 2022 and 2021
(Expressed in Canadian Dollars)

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

(g) Share-based payments

The Company grants share-based awards, including options, as an element of compensation to directors, officers, employees and service providers. The Company uses the Black-Scholes Option Pricing Model to measure the fair value for all share options granted, modified or settled during the period. Compensation expense is recorded based on the fair value of the award at the grant date, amortized over the vesting period. Each reporting date prior to vesting, the cumulative expense representing the extent to which the vesting period has expired and management's best estimate of the awards that are ultimately expected to vest is computed. The movement in cumulative expense is recognised in profit or loss or as capitalized to exploration and evaluation assets, as appropriate, with a corresponding entry within equity, against share-based payments reserve. No expense is recognised for awards that do not ultimately vest. When options are exercised, the proceeds received, together with any related amount in share-based payments reserve, are credited to share capital.

(h) Valuation of equity units issued in private placements

The Company has adopted a residual value method with respect to the measurement of shares and warrants issued as private placement units. The residual value method first allocates value to the most easily measurable component based on fair value and then the residual value, if any, to the less easily measurable component.

The fair value of the common shares issued in private placements is determined to be the more easily measurable component and are valued at their fair value. The balance, if any, is allocated to the attached warrants. Any fair value attributed to the warrants is recorded in reserves. If the warrants are exercised, the related amount is reclassified as share capital. If the warrants expire unexercised, the related amount remains in reserves.

(i) Financial instruments

The Company's financial instruments consist of cash, short-term investments, receivables, reclamation bonds, accounts payable, CEBA loan and lease liability.

Classification

On initial recognition, the Company classifies its financial instruments in the following categories: at ("FVTPL"), at fair value through other comprehensive income (loss) ("FVTOCI") or at amortized cost.

A financial asset is measured at amortized cost if it meets both of the following conditions and is not designated as FVTPL:

- it is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A debt investment is measured at FVTOCI if it meets both of the following conditions and is not designated as FVTPL:

- it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

An equity investment that is held for trading is measured at FVTPL. For other equity investments that are not held for trading, the Company may irrevocably elect to designate them as FVTOCI. This election is made on an investment-by-investment basis.

All financial assets not classified or measured at amortized cost or FVTOCI as described above are measured at FVTPL. This includes all derivative financial assets. On initial recognition, the Company may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortized cost or at FVTOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

Allegiant Gold Ltd.

Notes to the Consolidated Financial Statements
For the Years Ended September 30, 2022 and 2021
(Expressed in Canadian Dollars)

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

Financial liabilities are measured at amortized cost, unless they are required to be measured at FVTPL (such as instruments held for trading or derivatives) or the Company has elected to measure them at FVTPL.

Measurement

Financial assets at FVTOCI

Elected investments in equity instruments at FVTOCI are initially recognized at fair value plus transaction costs. Subsequently they are measured at fair value, with gains and losses recognized in other comprehensive income (loss).

Financial assets and liabilities at amortized cost

Financial assets and liabilities at amortized cost are initially recognized at fair value plus or minus transaction costs, respectively, and subsequently carried at amortized cost less any impairment.

Financial assets and liabilities at FVTPL

Financial assets and liabilities carried at FVTPL are initially recorded at fair value and transaction costs are expensed in profit or loss. Realized and unrealized gains and losses arising from changes in the fair value of the financial assets and liabilities held at FVTPL are recognized in profit or loss in the period in which they arise. Where management has opted to recognize a financial liability at FVTPL, any changes associated with the Company's own credit risk will be recognized in other comprehensive income (loss).

Impairment of financial assets at amortized cost

The Company recognizes a loss allowance for expected credit losses on financial assets that are measured at amortized cost. At each reporting date, the Company measures the loss allowance for the financial asset at an amount equal to the lifetime expected credit losses if the credit risk on the financial asset has increased significantly since initial recognition. If at the reporting date, the financial asset has not increased significantly since initial recognition, the Company measures the loss allowance for the financial asset at an amount equal to the twelve month expected credit losses. The Company shall recognize in profit or loss, as an impairment gain or loss, the amount of expected credit losses (or reversal) that is required to adjust the loss allowance at the reporting date to the amount that is required to be recognized.

Derecognition

Financial assets

The Company derecognizes financial assets only when the contractual rights to cash flows from the financial assets expire, or when it transfers the financial assets and substantially all of the associated risks and rewards of ownership to another entity. Gains and losses on derecognition are generally recognized in profit or loss. However, gains and losses on derecognition of financial assets classified as FVTOCI remain within accumulated other comprehensive income (loss).

Financial liabilities

The Company derecognizes financial liabilities only when its obligations under the financial liabilities are discharged, cancelled or expired. Generally, the difference between the carrying amount of the financial liability derecognized and the consideration paid and payable, including any non-cash assets transferred or liabilities assumed, is recognized in profit or loss.

(j) Government assistance

The Company recognizes government grants and assistance when there is reasonable assurance that the grant will be received, and any conditions associated with the grant have been met.

Bolo, Nevada

The Company holds a 100% interest in Bolo, subject to underlying royalties. On June 27, 2018, the Company entered into an agreement (the "Bolo Agreement"), as amended on October 24, 2018, December 14, 2018 and March 12, 2019, with New Placer Dome Gold Corp. ("NGLD"), under which NGLD may acquire up to a 50.01% undivided interest in Bolo by issuing common shares of NGLD to the Company, with an aggregate value of \$1,310,000 (US\$1,000,000) over a three year period, and also incurring certain exploration and evaluation expenditures on Bolo with a minimum aggregate value of \$5,240,000 (US\$4,000,000) by December 31, 2022. On April 24, 2019, the Company received 1,672,750 common shares of NGLD, representing an initial \$334,550 (US\$250,000) option payment. On January 29, 2020, the Company received 2,059,219 common shares of NGLD with a fair value of \$270,077, representing the first anniversary option payment of US\$250,000. On December 16, 2020, the Company received 1,170,483 common shares of NGLD with a fair value of \$351,145, representing the second anniversary option payment of US\$250,000.

In December 2021, the Company received 1,608,350 common shares of NGLD valued at \$144,752, representing the third anniversary option payment pursuant to the Bolo option agreement, and the Company received \$320,750 (US\$250,000) in cash and 2,402,119 common shares valued at \$192,170 (US\$150,000) from NGLD in connection with the Bolo option agreement. The cash and share payments totalling US\$400,000 were accepted by the Company in lieu of the exploration and evaluation expenditures that were required to be expended by NGLD before December 31, 2021.

Allegiant Gold Ltd.

Notes to the Consolidated Financial Statements
For the Years Ended September 30, 2022 and 2021
(Expressed in Canadian Dollars)

7. EXPLORATION AND EVALUATION ASSETS (continued)

NGLD may acquire an additional 24.99% interest in Bolo by incurring an additional \$5,240,000 (US\$4,000,000) in certain exploration and evaluation expenditures on Bolo within two years of acquiring the initial 50.01% interest in Bolo. If NGLD does not acquire the additional 24.99% interest, then NGLD will transfer a 0.02% interest in Bolo back to the Company.

In May 2022, NGLD was acquired by Copaur Minerals Inc. (“CPAU”), an exploration company listed on the TSXV, and accordingly all future commitments under the Bolo Agreement are now the responsibility of CPAU.

Eastside, Nevada

The Company holds a 100% interest in Eastside, subject to underlying royalties.

In July 2021, the Company entered into a lease agreement (the “Hilger Agreement”), with option to purchase, for certain mineral claims (the “Hilger Property”) located adjacent to the Eastside project. The terms of the lease require escalating cash and common share payments over the initial six years with the subsequent years having a fixed aggregate annual payments of US\$75,000. The first two years of lease payments totaling US\$60,000 were settled through the issuance of 163,733 common shares of the Company valued at \$49,939 during the year ended September 30, 2022.

The lease has a term of ten years with a renewal option for two additional ten year periods at the election of the Company.

At any time during the term of the lease, the Company has the option to purchase the Hilger Property for a cash payment of US\$750,000. On exercise of the option, the vendor will retain a 3% net smelter return royalty on production from the property, and the lease will terminate. The Company has the option to reduce the royalty by 2% in instalments of 1% each for payments of US\$1,000,000 per instalment. The Company must expend a minimum of US\$350,000 in expenditures on the Hilger Property before the fifth anniversary of the effective date of the Hilger Agreement, unless the option is exercised or the Hilger Agreement is terminated.

Four Metals, Arizona

The Company and MinQuest Ltd. each own a 50% interest in 16 unpatented lode mining claims that, in addition to 24 unpatented lode mining claims that are 100% owned by the Company, comprise the Four Metals project. On April 19, 2018 the Company and MinQuest Ltd. entered into an option agreement with Arizona Standard (US) Corp. (the “Four Metals Optionee”) and Barksdale Metals Corp. (“Barksdale”) granting the Four Metals Optionee an option to acquire a 100% interest in the Four Metals project. The option agreement requires the Four Metals Optionee to pay \$294,750 (US\$225,000) in staged payments over a five-year period. In addition, Barksdale will issue common shares with a total value of \$294,750 (US\$225,000) in staged issuances over the same five-year period. The cash payments and share issuances are shared equally with MinQuest Ltd. so that the Company will receive 50% of the cash and share payments.

In April 2022, the Company received cash of \$15,638 (2021 – \$15,125) and 33,688 (2021 – 30,944) common shares of Barksdale, with a fair value of \$15,833 (2021 - \$15,572).

Mogollon, New Mexico

The Company holds a 100% interest in Mogollon, subject to underlying royalties.

On August 21, 2020, the Company entered into an agreement with Summa Silver Corp. (“Summa”) wherein Summa can acquire a 75% interest in the Mogollon silver property in exchange for an initial cash payment of US\$50,000 and the issuance of 200,000 common shares of Summa, subsequent cash and share payments valued at US\$2,750,000 and by incurring exploration expenditures totalling US\$3,000,000 over a period of three years. Summa can further acquire the remaining 25% interest in Mogollon by paying the Company an additional US\$3,000,000 in either cash or common shares of Summa.

Allegiant Gold Ltd.

Notes to the Consolidated Financial Statements
For the Years Ended September 30, 2022 and 2021
(Expressed in Canadian Dollars)

7. EXPLORATION AND EVALUATION ASSETS (continued)

On August 26, 2020, the Company received a cash payment of \$65,826 (US\$50,000) and 200,000 common shares of Summa, with a fair value of \$424,000.

On August 17, 2021, the Company received a cash payment of \$126,000 (US\$100,000) and 352,351 common shares of Summa, with a fair value of \$352,351 (US\$300,000).

On October 11, 2021, the Company received 150,000 common shares of Summa valued at \$126,030 in connection with the approval of a royalty buy-down with one of the underlying claim owners.

On August 19, 2022, the Company received a cash payment of \$130,560 (US\$100,000) and 1,010,169 common shares of Summa, with a fair value of \$653,249.

Goldfield West, Nevada

The Company holds a 100% interest in certain minerals claims, subject to a 2% royalty.

On March 15, 2022, the Company entered into a mineral lease agreement (the Anchor Lease”) whereby the Company holds a ten year renewable lease on contiguous mineral claims in exchange for a cash payment of \$76,849 (US\$60,000), 277,668 common shares valued at \$105,514, future annual cash advance royalty payments commencing on the fifth anniversary of the Anchor Lease, and incurring an aggregate of US\$1,500,000 in exploration expenditures on the underlying claims of the Anchor Lease before the fifth anniversary of the Anchor Lease. A 2 % royalty is retained by the lessor.

Other

The Company held additional exploration and evaluation assets located in the USA, comprised of the following properties: Browns Canyon, Overland Pass, Clanton Hills, White Horse Flats, and White Horse North.

The Company determined that the lack of recent exploration and planned future exploration on these properties indicated the existence of impairment on these properties. Accordingly, the Company recorded an aggregate impairment of \$1,642,394 for the year ended September 30, 2021 and reduced the carrying value of each property to a nominal value of \$1.

During the year ended September 30, 2022, the Company elected to abandon Clanton Hills, White Horse Flats and White Horse North. As a result, the Company recorded a write-off of exploration and evaluation assets of \$6,935 (2021 - \$Nil).

8. CEBA LOAN

In May 2020, the Company received a \$40,000 loan from the Canada Emergency Business Account (“CEBA”). The terms of the loan are as follows:

- Repayment of 75%, or up to \$30,000, of the contribution amount, on or before December 31, 2022, will result in the forgiveness of 25%, or up to \$10,000 of the total contribution;
- No scheduled monthly repayments are required until after December 31, 2023;
- If 75% of the contribution amount is not repaid by December 31, 2022, the balance owing will be converted to an additional three (3) year term repayable contribution (with a fixed monthly repayment schedule), beginning January 2023, with no forgivable portion, and it will accrue interest at a rate of 5%;
- The full balance, of the contribution amount must be repaid no later than December 31, 2025.

In December 2020, the Company received an additional \$20,000 loan from CEBA under the same terms as the first loan advance, with the exception that if 50% of the loan is repaid on or before December 31, 2023, then the remaining \$10,000 will be forgiven.

On November 30, 2021, the Company repaid \$40,000 to fully extinguish the CEBA loan and recorded a \$20,000 gain on forgiveness of the debt.

9. ASSET RETIREMENT OBLIGATION

	September 30, 2022	September 30, 2021
	(\$)	(\$)
Balance, beginning	220,604	228,573
Accretion expense	3,426	3,391
Change in estimate	(85,833)	-
Foreign exchange	17,175	(11,360)
Balance, end	155,372	220,604

The Company's provision for restoration and environmental obligations consists of costs accrued based on the current best estimate of reclamation activities that will be required at the completion of exploration and evaluation activities. The Company's provision for future site closure and reclamation costs is based on the level of known disturbance at the reporting date, known legal requirements and estimates prepared by management. It is not currently possible to estimate the impact on operating results, if any, of future legislative or regulatory developments.

The Company has calculated the fair value of the asset retirement obligation using a risk-free discount rate of 4.16% (2021 – 0.57%) and an inflation rate of 1.88% (2021 – 1.90%). The estimated total future undiscounted cash flows to settle the asset retirement obligations are \$292,238 (US\$213,475) and are expected to be incurred over a period of approximately 15 years.

10. SHARE CAPITAL

Common shares

Authorized - unlimited common shares without par value.

Year Ended September 30, 2022

On October 28, 2021, the Company issued 163,733 common shares valued at \$49,939 in connection with the Eastside property.

On November 18, 2021, the Company issued 225,000 common shares pursuant to the exercise of restricted stock units ("RSUs"), and accordingly transferred \$23,625 from reserves to share capital.

On December 20, 2021, the Company issued 68,750 common shares pursuant to the exercise of RSUs, and accordingly transferred \$24,062 from reserves to share capital.

On March 17, 2022, the Company completed a non-brokered private placement wherein it issued 10,036,034 units at a price of \$0.40 per unit for aggregate proceeds of \$4,014,014. Each unit consisted of a common share and one half of a common share purchase warrant, and each whole warrant entitles the holder to acquire an additional common share at a price of \$0.70 for a period of two years from the date of closing. The warrants were valued at \$301,081.

On March 22, 2022, the Company issued 375,000 common shares pursuant to the exercise of RSUs, and accordingly transferred \$39,375 from reserves to share capital.

On March 22, 2022, the Company issued 277,668 common shares valued at \$105,514 in connection with the Goldfield West property (Note 7).

On April 13, 2022, the Company issued 56,287 common shares pursuant to the exercise of Agents' Warrants for gross proceeds of \$22,515. Additionally, \$12,388 has been transferred from reserves to share capital.

Allegiant Gold Ltd.

Notes to the Consolidated Financial Statements

(Expressed in Canadian Dollars)

10. SHARE CAPITAL (continued)

On April 22, 2022, the Company issued 250,000 common shares pursuant to the exercise of stock options for gross proceeds of \$25,000 included in receivables (Note 11). Additionally, \$26,850 and has been transferred from reserves to share capital.

On July 7, 2022, the Company issued 112,500 common shares pursuant to the exercise of RSUs, and accordingly transferred \$11,813 from reserves to share capital.

Year Ended September 30, 2021

On October 21, 2020, the Company issued 3,201,766 common shares with a value of \$1,072,592 to Orea to settle a loan liability with a face value of \$1,604,405 (Note 11). A gain on extinguishment of debt totaling \$486,211 was recorded.

On December 21, 2020, the Company issued 250,000 common shares pursuant to the exercise of stock options for gross proceeds of \$25,000. Additionally, \$26,850 and has been transferred from reserves to share capital.

On December 21, 2020, the Company issued 237,500 common shares pursuant to the exercise of RSUs and accordingly transferred \$24,938 reserves to share capital.

On April 22, 2021, the Company issued 350,000 common shares pursuant to the exercise of RSUs, and accordingly transferred \$36,751 reserves to share capital.

On June 1, 2021, the Company issued 53,000 common shares pursuant to the exercise of share purchase warrants for gross proceeds of \$21,200.

On June 4, 2021, the Company issued 275,000 common shares pursuant to the exercise of RSUs, and accordingly transferred \$28,874 reserves to share capital.

On August 19, 2021, the Company completed a bought deal financing under a short form prospectus wherein it issued 12,500,000 units at a price of \$0.40 per unit for aggregate proceeds of \$5,000,000. Each unit consisted of a common share and one half of a common share purchase warrant, and each whole warrant entitles the holder to acquire an additional common share at a price of \$0.70 for a period of two years from the date of closing. The warrants were valued at \$125,000. The Company paid cash fees totalling \$268,500 to the syndicate of Agents that completed the financing and issued a total of 296,250 Agent's Warrants, valued at \$65,200, which are exercisable at \$0.40 per share for a period of two years from the date of closing. The Company also incurred \$230,669 in legal fees and \$47,718 in filing fees.

On August 23, 2021, the Company issued 20,000 common shares pursuant to the exercise of share purchase warrants for gross proceeds of \$8,000.

Allegiant Gold Ltd.

(Expressed in Canadian Dollars)

10. SHARE CAPITAL (continued)

Compensation Securities

On January 13, 2022 the Company adopted a 10% rolling omnibus incentive plan that is comprised of restricted share units ("RSU") and incentive stock options ("Option"). The Board of Directors may from time to time, grant RSUs and Options to directors, officers, employees or consultants. The vesting terms of an RSU or Option are at the discretion of the Board of Directors.

The continuity of the Company's RSUs is as follows:

	Number of RSUs
Balance, September 30, 2020	3,187,500
Granted	200,000
Exercised	(862,500)
Balance, September 30, 2021	2,525,000
Granted	1,100,000
Forfeited	(225,000)
Exercised	(781,250)
Balance, September 30, 2022	2,618,750

As at September 30, 2022 there are 2,618,750 RSUs outstanding that 1,387,500 expire December 31, 2023 and 1,231,250 expire December 31, 2024.

The fair value of RSUs recognized as an expense during the year ended September 30, 2022 was \$323,573 (2021 - \$192,607). The fair value of each RSU is determined using the closing price of the common shares of the Company on the date of grant. The RSUs have varying vesting periods.

The continuity of the Company's Options is as follows:

	Number of Options	Weighted Average Exercise Price
		(\$)
Balance, September 30, 2020	1,340,000	0.22
Exercised	(250,000)	0.10
Balance, September 30, 2021	1,090,000	0.25
Granted	2,530,000	0.36
Exercised	(250,000)	0.10
Expired	(200,000)	0.55
Balance, September 30, 2022	3,170,000	0.33

Allegiant Gold Ltd.

Notes to the Consolidated Financial Statements
For the Years Ended September 30, 2022 and 2021
(Expressed in Canadian Dollars)

10. SHARE CAPITAL (continued)

A summary of the Company's Options at September 30, 2022 is as follows:

Exercise Price (\$)	Options Outstanding		Options Exercisable	
	Number of Options Outstanding	Weighted Average Remaining Contractual Life (yrs)	Number of Options Exercisable	Weighted Average Remaining Contractual Life (yrs)
0.35	1,800,000	4.12	900,000	4.12
0.10	500,000	1.98	500,000	1.98
0.42	300,000	1.55	75,000	1.55
0.46	30,000	1.56	7,500	1.56
0.37	400,000	1.44	200,000	1.44
0.60	140,000	0.33	140,000	0.33
0.33	3,170,000	3.01	1,822,500	2.83

The fair value of Options recognized as an expense during the year ended September 30, 2022 was \$546,019 (2021 - \$25,479).

The fair value of each Option is estimated on the date of grant using the Black-Scholes Option Pricing Model that uses the assumptions noted in the table below. Expected volatilities are based on historical volatility of the Company's shares, and other factors. The expected term of Options granted represents the period of time that Options granted are expected to be outstanding. The risk-free rate of periods within the contractual life of the Option is based on the Canadian government bond rate. Assumptions used for Options granted during the years ended September 30, 2022 and 2021 were as follows:

Grant Date	Number of Options	Expected Price Volatility (%)	Risk Free Interest Rate (%)	Expected Life (yrs)	Expected Dividend Yield (%)	Fair Value Per Option (\$)	Total Fair Value (\$)
May 16, 2022	300,000	81	2.64	2.00	-	0.21	62,500
April 22, 2022	30,000	79	2.65	2.00	-	0.20	6,100
March 22, 2022	400,000	94	1.46	2.00	-	0.19	74,200
November 10, 2021	1,800,000	114	1.47	5.00	-	0.28	507,100

Warrants

The continuity of the Company's warrants is as follows:

	Number of Options	Weighted Average Exercise Price (\$)
Balance, September 30, 2020	6,445,096	0.40
Issued	6,546,250	0.69
Exercised	(73,000)	0.40
Balance, September 30, 2021	12,918,346	0.55
Issued	5,018,017	0.70
Exercised	(56,287)	0.40
Expired	(6,372,096)	0.40
Balance, September 30, 2022	11,507,980	0.69

Allegiant Gold Ltd.

Notes to the Consolidated Financial Statements
For the Years Ended September 30, 2022 and 2021
(Expressed in Canadian Dollars)

10. SHARE CAPITAL (continued)

A summary of the Company's warrants at September 30, 2022 is as follows:

Number of Warrants	Weighted Average Exercise Price (\$)	Expiry Date	Weighted Average Remaining Contractual Life (yrs)
5,018,017	0.70	March 17, 2024	1.46
239,963	0.40	August 19, 2023	0.88
6,250,000	0.70	August 19, 2023	0.88
11,507,980	0.69		1.14

Reserves

RSUs, Options and Warrants

The RSUs, Options and warrants reserve records items recognized as stock-based compensation expense and other share-based payments until such time that the RSUs, Options or warrants are exercised, at which time the corresponding amount will be transferred to share capital.

Accumulated other comprehensive income (loss)

The accumulated other comprehensive income (loss) reserve records unrealized exchange differences arising on translation of foreign operations that have a functional currency other than the Company's reporting currency.

11. RELATED PARTY TRANSACTIONS

Key management personnel include those persons having authority and responsibility for planning, directing and controlling the activities of the Company as a whole. The Company has determined that key management personnel consist of executive and non-executive members of the Company's Board of Directors and corporate officers. The remuneration of directors and other members of key management personnel during the years ended September 30, 2022 and 2021 is as follows:

	September 30, 2022 (\$)	September 30, 2021 (\$)
Office rent paid or accrued to Orea, a company that shares a director in common	18,000	18,000
Management fees paid or accrued to a corporation controlled by the former Chairman of the Company	-	24,000
Management and administration fees paid or accrued to the CEO of the Company	232,832	230,117
Professional fees paid to a corporation controlled by the CFO of the Company	125,400	120,000
Director fees paid or accrued	118,000	127,839
Consulting fees paid to a director of the Company	10,000	-
Share-based compensation in the form of vested stock options and RSUs issued to directors, officers and consultants of the Company	724,281	157,284
Exploration and evaluation expenditures paid or accrued to a director of the Company	115,316	101,613
	1,343,829	778,853

Allegiant Gold Ltd.

Notes to the Consolidated Financial Statements
For the Years Ended September 30, 2022 and 2021
(Expressed in Canadian Dollars)

11. RELATED PARTY TRANSACTIONS (continued)

The following summarizes advances and amounts payable to related parties:

	September 30, 2022	September 30, 2021
	(\$)	(\$)
Receivable from officer of the Company	25,000	-
Advances to officers of the Company	62,502	-
Amounts due to directors, included in accounts payable	(34,262)	(23,190)
	53,240	(23,190)

As at September 30, 2021, the Company had a principal balance of \$Nil (September 30, 2020 - \$1,604,405) owing to Orea (the "Grid Note") originally due on March 1, 2019. On March 5, 2019, the Company issued 1,000,000 common shares valued at \$190,000 in exchange for extending the due date to December 31, 2020.

As the Grid Note was initially a non-current liability, the Company discounted the Grid Note with a 20% annual discount rate, resulting in a discount of \$213,639 allocated to the reserves account. Upon issuing the extension shares, the Grid Note was recognized as a new financial liability and the fair value of the extension shares was expensed. The Company discounted newly issued Grid Note with a 15% annual discount rate, resulting in a discount of \$383,665 allocated to the reserves account. On October 21, 2020, the Company issued 3,201,766 common shares to settle the balance of the Grid Note and recorded a gain of \$486,211. During the year ended September 30, 2021, the Company recorded accretion expense of \$13,088 in connection with the Grid Note.

12. SEGMENTED INFORMATION

The Company has one reportable business segment, being mineral exploration and evaluation. All of the Company's long-term assets are located in the USA.

13. FINANCIAL RISK AND CAPITAL MANAGEMENT

Financial risk

The Company's financial instruments are exposed to certain financial risks. The risk exposures and the impact on the Company's financial instruments at September 30, 2022 are summarized below. The Board of Directors periodically reviews with management the principal risks affecting the Company and the systems that have been put in place to manage these risks.

Credit risk

The credit risk exposure on cash is limited to its carrying amount at the date of the statements of financial position. Cash is held as cash deposits with creditworthy banks in Canada and the USA, and risk is assessed as low.

The credit risk exposure on reclamation bonds is limited to its carrying amount at the date of the statements of financial position. Reclamation bonds are held by the USA Forest Service and the US Bureau of Land Management, and risk is assessed as low.

The credit risk exposure on receivables is limited to its carrying amount at the date of the statements of financial position. Receivables are due primarily from the Canada Revenue Agency for GST/HST refunds.

Allegiant Gold Ltd.

Notes to the Consolidated Financial Statements
For the Years Ended September 30, 2022 and 2021
(Expressed in Canadian Dollars)

13. FINANCIAL RISK AND CAPITAL MANAGEMENT (continued)

Liquidity risk

Liquidity risk arises from the Company's general and capital financing needs. The Company manages liquidity risk by attempting to maintain sufficient cash balances. Liquidity requirements are managed based on expected cash flows to ensure that there is sufficient capital in order to meet short term obligations. As at September 30, 2022, the Company had a working capital of \$4,189,322 (September 30, 2021 – \$4,602,843) so liquidity risk is assessed as low.

Market risks

(i) Foreign currency risk

The Company's presentation currency is the Canadian dollar, and the functional currency of AGUS was the US dollar until June 30, 2022 and functionally Canadian thereafter. The Company is exposed to the currency risk related to the fluctuation of foreign exchange rates in its US subsidiary. The Company also has certain assets and liabilities denoted in US dollars. A significant change in the currency exchange rates between the Canadian dollar relative to the US dollar could have an effect on the Company's results of operations, financial position and/or cash flows. The Company has not hedged its exposure to currency fluctuations.

(ii) Commodity price risk

The Company's ability to raise capital to fund exploration or development activities is subject to risks associated with fluctuations in the market price of gold. The Company closely monitors commodity prices to determine the appropriate course of action to be taken.

(iii) Interest rate risk

The Company does not have any variable interest-bearing debt and is therefore not exposed to interest rate risk.

Sensitivity analysis

A 10% change in interest rates does not have a significant effect on the Company's profit or loss.

The Company has certain assets and liabilities in US Dollars, a currency other than the functional currency of Company. The Company estimates that a +/-10% change in the value of the Canadian dollar relative to the US dollar would affect the Company's profit or loss by \$8,905 and \$128,659 on net assets.

Capital management

The Company considers the components of equity as being capital. The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to pursue the development of its mineral properties and to maintain a flexible capital structure for its projects for the benefit of its stakeholders. As the Company is in the exploration stage, its principal source of funds is from equity financings.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares, enter into joint venture property arrangements, acquire or dispose of assets or adjust the amount of cash and investments.

The Company is not subject to any capital restrictions and there were no changes in approach in the 2022 fiscal year.

Allegiant Gold Ltd.

Notes to the Consolidated Financial Statements
For the Years Ended September 30, 2022 and 2021
(Expressed in Canadian Dollars)

13. FINANCIAL RISK AND CAPITAL MANAGEMENT (continued)

Fair value

The fair value of the Company's financial instruments, including cash, short-term investments, receivables and accounts payable approximates their carrying value due to the immediate or short-term maturity of these financial instruments. These items are measured at amortized cost.

The fair value of the reclamation bonds approximates their fair value based on current interest rates and high liquidity.

The fair value of the short-term investments is measured using level 1 of the fair value hierarchy.

IFRS 9, Financial Instruments: Disclosure establishes a fair value hierarchy that prioritizes the input to valuation techniques used to measure fair value as follows:

Level 1 – quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2 – inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and

Level 3 – inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The Company has determined the estimated fair values of its financial instruments based upon appropriate valuation methodologies.

14. INCOME TAXES

Income tax expense differs from the amount that would result from applying the Canadian federal and provincial income tax rates to loss before income taxes. These differences result from the following items:

	Year ended	
	September 30, 2022	September 30, 2021
	(\$)	(\$)
Loss before taxes	(1,731,825)	(2,850,899)
Canadian federal and provincial income tax rates	27%	27%
Expected income tax expense (recovery)	(468,000)	(770,000)
Foreign tax differences, rate changes and foreign exchange	(482,000)	(355,000)
Non-taxable items	334,000	457,000
Share issue costs	(165,000)	(148,000)
Adjustment to prior years provision versus statutory tax returns	(108,000)	-
-Change in valuation of deferred tax assets	889,000	816,000
Income tax (recovery) expense	-	-

Allegiant Gold Ltd.

Notes to the Consolidated Financial Statements
For the Years Ended September 30, 2022 and 2021
(Expressed in Canadian Dollars)

14. INCOME TAXES (continued)

The Company has the following deductible temporary differences for which no deferred tax asset has been recognized:

	September 30, 2022	September 30, 2021
	(\$)	(\$)
Net operating losses carried forward	7,175,000	6,572,000
Share issuance costs	130,000	151,000
Allowable capital losses	63,000	178,000
Investments	76,000	110,000
Resource properties costs	762,000	348,000
Valuation allowance	(8,248,000)	(7,359,000)
	-	-

As of September 30, 2022, the Company has Canadian tax loss carry-forwards of approximately \$4,524,000 (2021 - \$3,644,000) available to reduce future years' taxable income. The Company recognizes the benefit of tax losses only to the extent of anticipated future taxable income in the relevant jurisdictions.

In addition, the Company has non-capital losses in its United States subsidiary which will expire over various terms. The amount of those non-capital losses carried forward is \$28,355,000.

15. SUPPLEMENTAL CASH FLOW INFORMATION

The Company's non-cash investing and financing transactions are as follows:

	September 30, 2022	September 30, 2021
	(\$)	(\$)
Received short-term investments as an option payment for the Mogollon property (Note 7)	779,279	352,351
Received short-term investments as an option payment for the Bolo property (Note 7)	336,922	351,145
Received short-term investments as an option payment for the Four Metals property (Note 7)	15,833	15,572
Fair value transfer from reserves to share capital for RSU, warrant and option exercises	138,113	90,563
Shares issued for receivable	25,000	-
Shares issued for exploration and evaluation assets	155,453	-
Adjustment to asset requirement obligation applied to exploration and evaluation asset	85,833	-
Issued 471,600 finders' warrants (Note 10)	-	65,200
Issued 3,201,766 common shares to settle the Orea grid note	-	1,072,592
	1,536,433	1,974,273

Allegiant Gold Ltd.

Notes to the Consolidated Financial Statements
For the Years Ended September 30, 2022 and 2021
(Expressed in Canadian Dollars)

16. COMMITMENT

The Company entered into a lease agreement on May 1, 2022 for the rental of storage space in Reno, Nevada with a term that expires on April 30, 2024 with an option to renew the lease for a further term of 2 years expiring on April 30, 2026. The remaining rent payable under the lease is \$64,029 (US\$46,772) up until the lease expires.

17. SUBSEQUENT EVENTS

Subsequent to September 30, 2022, the Company:

- a) granted 1,075,000 stock options exercisable at \$0.25 for a period of five years.
- b) granted 1,350,000 RSUs that expire on December 31, 2025.
- c) issued 150,000 common shares pursuant to the exercise of RSUs.
- d) received notification from CPAU that it has fulfilled its 50.1% earn-in obligations under the initial option agreement on the Bolo property (Note 7) and its intention to earn an additional 24.99% interest. The Company is currently reviewing the information supplied by CPAU.
