

New Release

ALLEGiant RECEIVES BLM APPROVAL FOR EXPLORATION AT CASTLE ZONE WITHIN EASTSIDE GOLD PROJECT PLAN OF OPERATION SIGNIFICANTLY EXPANDS THE PROJECT AREA

Tonopah, Nevada / August 20, 2025 - Allegiant Gold Ltd. ("Allegiant" or the "Company") (AUAU: TSX-V) (AUXXF: OTCQX) is pleased to announce that it has received formal approval from the Bureau of Land Management (BLM) and the Nevada Division of Environmental Protection (NDEP) for its Environmental Assessment (EA) and Plan of Operations for the Castle Project, located in Esmeralda County, Nevada, approximately 22 miles west of Tonopah.

The approval allows Allegiant to proceed with an extensive multi-year exploration program, including up to 50 acres of surface disturbance, multiple drill phases, and the ability to construct roads, drill pads, sumps, staging areas, and conduct trenching over a highly prospective gold-bearing area; leading to more comprehensive large-scale exploration.

CASTLE PROJECT PLAN HIGHLIGHTS:

- Approved for up to 145 drill pads in Phase I, with flexibility for additional drilling phases
- Up to 50 acres of permitted disturbance within a 1,658-acre project boundary
- Located adjacent to the historic Boss Mine, Castle has an inferred resource of 314,000 ounces of gold¹
- Significant infrastructure advantages with direct highway access via US Routes 6 and 95

Peter Gianulis, CEO of Allegiant Gold, commented: *"The approval of the Castle Plan of Operations is a significant milestone for Allegiant. This permit provides the scale and flexibility we need to aggressively test a large and highly prospective gold system at Eastside and in the heart of Nevada's Walker Lane trend. We believe the Castle Project has the potential to deliver new discoveries at Eastside and grow into a substantial exploration asset, especially given its proximity to historic production, favorable logistics, and extensive past data."*

¹ The updated resource estimate ("Updated Resource Estimate and NI 43-101 Technical Report, Eastside and Castle Gold-Silver Project Technical Report, Esmeralda County, Nevada") conducted by Mine Development Associates ("MDA") of Reno, Nevada, with an effective date of July 30, 2021, contained a pit-constrained Inferred Resources (cut-off grade of 0.15 g/t Au) of 61,730,000 tonnes grading 0.55 g/t Au and 4.4 g/t Ag at the Original Pit Zone (1,090,000 ounces gold and 8,700,000 ounces silver) and 19,986,000 tonnes grading 0.49 g/t Au at the Castle Area (314,000 ounces gold). A copy of the Eastside Technical Report can be found on SEDAR at www.sedar.com.

ABOUT ALLEGIANT

Allegiant owns three highly prospective gold projects in the United States all of which are in the mining-friendly jurisdiction of Nevada. Allegiant's flagship, district-scale Eastside project hosts a large and expanding gold/silver resource and is in an area of excellent infrastructure. Preliminary metallurgical testing indicates that both oxide and sulphide gold mineralization at Eastside is amenable to heap leaching.

ON BEHALF OF THE BOARD

Peter Gianulis
